## Name:

for year 6 Maths

teachit primary

## Section 1 - pupil's section

## Number: number and place value

Resource 1 - read, write, order and compare numbers up to $10,000,000$ ..... 008
Resource 2 - use negative numbers in context ..... 010
Resource 3 - solve number and practical problems ..... 013
Number: addition, subtraction, multiplication and division
Resource 1 - multiply multi-digit numbers up to 4 digits ..... 016
Resource 2 - formal long division ..... 019
Resource 3 - formal short division ..... 024
Resource 4 - perform mental calculations ..... 027
Resource 5 - identify common factors, multiples and prime numbers ..... 029
Resource 6 - BODMAS ..... 032
Resource 7 - addition and subtraction multi-step problems ..... 034
Resource 8 - addition, subtraction, multiplication and division problems ..... 036
Resource 9 - use estimation to check answers ..... 039
Number: fractions (including decimals and percentages)
Resource 1 - use common factors to simplify fractions ..... 139
Resource 2 - add and subtract fractions ..... 140
Resource 3 - multiply proper fractions ..... 141
Resource 4 -divide fractions by whole numbers ..... 143
Resource 5 - multiply numbers up to two decimal places ..... 144
Resource 6 - written division methods up to two decimal places ..... 146
Resource 7 - use equivalences between fractions, decimals and percentages ..... 147
Ratio and proportion
Resource 1 - relative sizes ..... 148
Resource 2 - calculations of percentages ..... 149
Resource 3 - scale factors ..... 150
Resource 4 -unequal sharing ..... 151
Algebra
Resource 1 - use simple formulae ..... 153
Resource 2 - generate and describe linear number sequences ..... 153
Resource 3 - express missing number problems algebraically ..... 154
Resource 4 - working with two variables ..... 155
Measurement
Resource 1 - solve problems involving units of measure ..... 157
Resource 2 - convert between miles and kilometres ..... 158
Resource 3 - area and perimeter ..... 159
Resource 4 - use formula for area and volume of shapes ..... 160
Resource 5 - calculate the area of parallelograms and triangles ..... 160
Geometry: properties of shape
Resource 1 - draw, compare and classify 2D shapes ..... 162
Resource 2 - recognise, describe and build simple 3D shapes ..... 163
Resource 3 - illustrate and name parts of the circle ..... 164
Resource 4 - recognise angles ..... 164
Geometry: position and direction
Resource 1 - draw, translate and reflect shapes in all four quadrants ..... 166
Statistics
Resource 1 - interpret and construct pie charts and line graphs ..... 167
Resource 2 - using the mean ..... 168
Teacher's section and answers
Teaching notes and curriculum mapping ..... 126
Teacher's tick list ..... 127
Number: number and place value
Resource 1 - read, write, order and compare numbers up to $10,000,000$ ..... 129
Resource 2 - use negative numbers in context ..... 129
Resource 3 - solve number and practical problems ..... 130
Number: addition, subtraction, multiplication and division
Resource 1 - multiply multi-digit numbers up to 4 digits ..... 131
Resource 2 - formal long division ..... 132
Resource 3 - formal short division ..... 134
Resource 4 - perform mental calculations ..... 135
Resource 5 - identify common factors, multiples and prime numbers ..... 135
Resource 6 - BODMAS ..... 136
Resource 7 - addition and subtraction multi-step problems ..... 137
Resource 8 - addition, subtraction, multiplication and division problems ..... 137
Resource 9 - use estimation to check answers ..... 138
Number: fractions (including decimals and percentages)
Resource 1 - use common factors to simplify fractions ..... 139
Resource 2 - add and subtract fractions ..... 140
Resource 3 -multiply proper fractions ..... 141
Resource 4 - divide fractions by whole numbers ..... 143
Resource 5 - multiply numbers up to two decimal places ..... 144
Resource 6 - written division methods up to two decimal places ..... 146
Resource 7 - use equivalences between fractions, decimals and percentages ..... 147
Ratio and proportion
Resource 1 - relative sizes ..... 148
Resource 2 - calculations of percentages ..... 149
Resource 3 - scale factors ..... 150
Resource 4 -unequal sharing ..... 151
Algebra
Resource 1 - use simple formulae ..... 153
Resource 2 - generate and describe linear number sequences ..... 153
Resource 3 - express missing number problems algebraically ..... 154
Resource 4 - working with two variables ..... 155
Measurement
Resource 1 - solve problems involving units of measure ..... 157
Resource 2 - convert between miles and kilometres ..... 158
Resource 3 - area and perimeter ..... 159
Resource 4 - use formula for area and volume of shapes ..... 160
Resource 5 - calculate the area of parallelograms and triangles ..... 160
Geometry: properties of shape
Resource 1 - draw, compare and classify 2D shapes ..... 162
Resource 2 - recognise, describe and build simple 3D shapes ..... 163
Resource 3 - illustrate and name parts of the circle ..... 164
Resource 4 - recognise angles ..... 165
Geometry: position and direction
Resource 1 - draw, translate and reflect shapes in all four quadrants ..... 166
Statistics
Resource 1 - interpret and construct pie charts and line graphs ..... 167
Resource 2 - using the mean ..... 168

## Section 1:

## Number

## In this task, you will:

- read, write, order and compare numbers up to $10,000,000$ and determine the value of each digit
- round any whole number to a required degree of accuracy.

Look at the examples and answer the questions. If you are anxious, try questions 1 12. If you're feeling confident, try questions 1-15. If you're raring to go, try the challenge too!

Example 1
a. Write in words the number 40,078 .
b. Write down the new place value of the 7 when this number is multiplied by ten.

|  |  | $=$ thousand |  |  |
| :--- | :---: | :---: | :---: | :--- |
| Answers |  |  |  |  |
| a. Ten Th. | Th. | Hu. | Tens | Ones |
| 4 | 0, | 0 | 7 | 8 |

b. $40,078 \longrightarrow$ forty thousand and seventy eight.
$40,078 \times 10=400,780$. The 7
represents 7 hundred.

## Example 2

Round these numbers to the degree of accuracy given in the brackets:
a. 6835 (nearest 1000)
b. 4723 (nearest 100)
c. 14,924 (nearest 10 )

## Answers

a. $6835 \longrightarrow 7000$
b. $4723 \longrightarrow 4700$
c. $14,924 \longrightarrow 14,920$

Write in words:

1. 1523 $\qquad$
2. 8071
3. 17,080
4. $8,230,050$

Write in figures:
5. Six thousand, seven hundred and two
6. Twelve thousand, five hundred and eighty
7. Half of a million
8. Ten million, fifty thousand and one hundred

$\qquad$
$\xrightarrow{ }$
$\qquad$

Resource 1 - read, write, order and compare numbers up to $10,000,000$
For each of the following numbers, write down the place value of 9 :
9. 1943
10. 90,500
$\qquad$
$\longrightarrow$
11. $9,154,000$
12. $94 \times 10$
$\qquad$
$\qquad$

Round the following numbers to the degree of accuracy indicated in the brackets:

## Challenge

Using the following digit cards write down:

1. The largest five-digit number.
2. A three-digit number which has a tens digit that is double the hundreds digit.
3. A 5-digit number that rounds to sixty thousand.
4. A 4-digit number that rounds to five thousand.
5. A number that rounds to one hundred thousand.
6. All the numbers round to ninety.
7. The smallest 3 -digit number where the hundreds digit is treble the units digit.

Answer

## In this task, you will:

- use negative numbers in context, and calculate intervals across 0.

Look at the examples and answer the questions. If you are anxious, try questions 1 -
6. If you're feeling confident, try questions 1-9. If you're raring to go, try the challenge too!

## Examples

a. Write down the temperature indicated by the arrows below.

b. What is the difference between the temperatures given by c and a above? Counting up from -7 to 3 takes 10 steps so the difference is $10^{\circ} \mathrm{C}$.

1. Write down the temperature indicated by the arrows below.

2. Write down the temperature indicated by the arrows below.

| $\mathrm{a}=\quad \mathrm{b}=$ | $\mathrm{c}=$ |
| :--- | :--- | :--- |

3. Write down the temperatures indicated on the thermometers below.
a. $\qquad$

b. $\qquad$
-3

4. The negative number for today is
a. 4 more
b. 2 less
c. 20 more
d. 20 less
$\square$
$\qquad$
$\qquad$
$\square$
$\qquad$
$\qquad$
5. The temperature in Madrid overnight is $-7^{\circ} \mathrm{C}$. During the morning it rose by $15^{\circ} \mathrm{C}$. What is the new temperature?
6. What temperature is 15 degrees lower than $8^{\circ} \mathrm{C}$ ?
7. The temperature rises by 17 degrees from $-9^{\circ} \mathrm{C}$. What is the new temperature?

${ }^{\circ} \mathrm{C}$
${ }^{\circ} \mathrm{C}$
8. The temperature in New York at 8 am is $-2^{\circ} \mathrm{C}$.
a. By 2 pm the temperature has risen by $14^{\circ} \mathrm{C}$. What is the temperature at 2 pm ?

## ${ }^{0} \mathrm{C}$

b. Overnight the temperature drops to $-6^{\circ} \mathrm{C}$. How many degrees did it fall by?
c. On another occasion, the lowest temperature was $-8^{\circ} \mathrm{C}$ and the highest was $11^{\circ} \mathrm{C}$. What is the difference between these temperatures?
9. Complete the following sequences:
a. $\square$ 1 $\square$ $7 \square$
b. $\square$
$\square$ 26 10
c. $\square$
$\square$ 28 14

## Challenge

On the diagram, we can see that c is halfway between points a and b . It is worth 1 .

Find the number that is halfway between the following pairs of numbers:
a. -2 and 6
b. $\quad-6$ and 2
C. $\quad-3$ and 9
d. -10 and -4
e. Find the number halfway between - 24 and 36 and explain how you found it.

## In this task, you will:

- solve number and practical problems that involve whole numbers, rounding and negative numbers.

Look at the examples and answer the questions. If you are anxious, try questions 1 6. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

## Example 1

In the number 7.539:

1. What does the digit 3 represent?
2. Round this number to:
a. the nearest whole number
b. 1 decimal place

Answers

1. 3 represents $\frac{3}{100}$ or three hundredths
2. a. $7.539 \approx 8$
b. $7.539 \approx 7.5$

## Example 2

Circle two numbers which have a difference of 2

$$
\begin{array}{llllll}
-2 & -1.5 & 0 & 0.5 & 1 & 1.5
\end{array}
$$

Two possible answers
-2 and 0
-1.5 and 0.5

1. Round the following to the nearest whole number.
a. $7.632 \approx$ $\qquad$
b. $17.3 \approx$ $\qquad$
c. $405.99 \approx$ $\qquad$
2. Using each of the digits $\square$ and
$\square$ 9 only once in each number:
a. write down the largest even number and the smallest odd number.

Largest even number: $\qquad$
Smallest odd number: $\qquad$
b. make a 3-digit number that rounds to one thousand.

Resource 3 - solve number and practical problems
3. Fill in the possible numbers:

| Number | 47 | $\ldots \ldots \ldots$ | 961 | $\ldots \ldots \ldots$ | $\ldots \ldots$ |
| ---: | :---: | :---: | :---: | :---: | :---: |
| Rounded to the nearest 10 | $\ldots \ldots \ldots$ | 50 | $\ldots \ldots$. | 90 | 200 |

4. Using each of the digits $3,6,4$ and 9 only once in each number, write:
a. the smallest odd number that can be made $\qquad$
b. the largest 3-digit that can be made $\qquad$
c. a 3-digit number that rounds to five hundred $\qquad$
d. the value of the ones digit in the largest 2-digit number that can be made
$\qquad$
e. the value of the hundreds digit in the answer when the largest 2-digit odd number is multiplied by 10 $\qquad$
5. The temperature in Leeds was $-5^{\circ} \mathrm{C}$ at midnight. By midday, the temperature had risen by $12^{\circ} \mathrm{C}$.
a. What was the temperature at midday? $\qquad$ By 10 o'clock that evening, the temperature had fallen to $-1^{\circ} \mathrm{C}$.
b. By how much did the temperature fall? $\qquad$
6. What number is five hundred less than one million? $\qquad$
7. The diagram below shows that 6 is halfway between the numbers three and nine. What number is halfway between -1 and 5 ?

8. Alice has $£ 732$ in her bank account. Jim has -£127 in his bank account.
a. Round the amount of money in Alice's account to the nearest £10.

b. Round the amount of money in Jim's account to the nearest £10.
c. How much more money does Alice have than Jim?

## Challenge

1. What number is halfway between:
a. -4 and 6 ? $\square$ b. -7 and 5?
2. The number eight is halfway between two and another. What is the other number?
3. Write down the 4-digit number that obeys the following instructions: $\square$

- It rounds to 3000 .
- The thousands digit is half the units digit.
- The tens digit is the sum of the thousands and units digits.

## In this task, you will:

- multiply multi-digit numbers up to 4 digits by a two-digit whole using the formal written method of long multiplication.

Look at the examples and answer the questions. If you are anxious, try questions 1 2. If you're feeling confident, try questions 1-4. If you're raring to go, try the challenge too!

## Example 1

Find the product of $1756 \times 49$.

|  | 1 | 7 | 5 | 6 |
| :---: | :---: | :---: | :---: | :---: |
| $\times$ |  |  | 4 | 9 |
| 1 | $5_{6}$ | $8_{5}$ | $0_{5}$ | 4 |
| $7_{3}$ | $0_{2}$ | $2_{2}$ | 4 | 0 |
| 8 | $6_{1}$ | 0 | 4 | 4 |

$1756 \times 9=15,804$
$9 \times 6=54 ; 4$ down 5 to carry.
$9 \times 5=45 ;$ add the 5 to give 50 , so 0 down 5 to carry.
$9 \times 7=63$; add the 5 to give 68 , so 8 down 6 to carry.
$9 \times 1=9$; add the 6 to give 15.
Similarly, $1756 \times 40=70,240$
Finally, add $15,804+70,240=86,044$

## Example 2

Fill in the gaps to complete this long multiplication sum.

|  |  |  | 2 | 7 |
| :---: | :---: | :---: | :---: | :---: |
| $\times$ |  |  | 4 |  |
|  | 1 | $1_{2}$ | $4_{6}$ | 3 |
|  | $5_{1}$ | 2 | 8 | 0 |
|  |  | $2_{1}$ |  | 3 |

$7 \times$ what $=\ldots 3 ; 7 \times 9=63 ; 3$ down 6 to carry.
$9 \times 2$ = 18; add the 6 gives 24 , 4 down 2 to carry.
$9 \times 1=9$; add the 2 gives the final 11 .
$127 \times 40=5080$
Finally adding $1143+5080=6223$
Answer $127 \times 49=6223$

1. Complete the following long multiplications:

| a. |  |  | 3 | 2 |
| :--- | :--- | :--- | :--- | :--- |
|  | $\times$ |  | 2 | 3 |
|  |  |  |  |  |
|  |  |  |  | 0 |
|  |  |  |  |  |

| b. |  |  | 1 | 4 |
| :--- | :--- | :--- | :--- | :--- |
|  | $\times$ |  | 2 | 1 |
|  |  |  |  |  |
|  |  |  |  | 0 |
|  |  |  |  |  |
|  |  |  |  |  |

| c. |  |  | 3 | 1 |
| :--- | :--- | :--- | :--- | :--- |
|  | $\times$ |  | 2 | 4 |
|  |  |  |  |  |
|  |  |  |  | 0 |
|  |  |  |  |  |

2. Complete the following long multiplications:

| 1. |  | 1 | 3 | 2 |
| :--- | :--- | :--- | :--- | :--- |
|  | $\times$ |  | 3 | 1 |
|  |  |  |  |  |
|  |  |  |  | 0 |
|  |  |  |  |  |

| 2. |  | 2 | 4 | 3 |
| :--- | :--- | :--- | :--- | :--- |
|  | $\times$ |  | 2 | 1 |
|  |  |  |  |  |
|  |  |  |  | 0 |
|  |  |  |  |  |

| 3. |  | 5 | 2 | 3 |
| :---: | :---: | :---: | :---: | :---: |
| $\times$ |  |  | 3 | 2 |
|  |  |  |  |  |
|  |  |  |  | 0 |
|  |  |  |  |  |

3. Find the products of the following multiplications:
a. $483 \times 53$

b. $821 \times 37$

|  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |

4. Find the following products:
a. $\quad 2743 \times 54$

b. $4095 \times 63$

|  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |

c. $1986 \times 85$

|  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |

## Challenge

Fill in the missing gaps in the following multiplications:
1.

|  |  |  | 6 |  |
| :--- | :--- | :--- | :--- | :--- |
|  | $\times$ |  | 4 | 7 |
|  |  |  | 3 | 4 |
|  | 2 | 4 |  | 0 |
|  | 2 | 9 |  | 4 |

3. $\square$
6 $\square$
$\square$ 3 3 5

## In this task, you will:

- divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context.

Look at the examples and answer the questions. If you are anxious, try questions 13. If you're feeling confident, try questions 1-5. If you're raring to go, try the challenge too!

## Example 2

A coach can fit 53 people in it. How many coaches are needed for a school trip for 400 people?

|  |  |  |  | 7 | r 29 | $\begin{aligned} & \text { Multiples of } 53: 53,106,159,212,265,318,371, \\ & 424,477,530 \\ & (53 \times 7=371) \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 5 | 3) | 4 | 0 | 0 |  |  |
|  |  | 3 | 7 | 1 |  |  |
|  |  |  | 2 | 9 |  |  |

Since we can't leave out the remaining 29 people, we would need 8 coaches.
Top tip: usually when we need 'how many?' we round up; if it's 'how many can we get?'

[^0]1. Complete the following division sums:
a. $704 \div 16=$ $\qquad$ b. $903 \div 43=$

2. Complete the following division sums:
a. $3806 \div 22=$ $\qquad$ b. $5148 \div 36=$

| 2 |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 2 | 2 | 3 | 8 | 0 | 6 |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

| 3 | $6)$ | 5 | 1 | 4 | 8 |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |

3. Complete the following division sums and express the remainder as a whole number:
a. $940 \div 29=$
b. $4560 \div 32=$

|  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 3 | 2 | 4 | 5 | 6 | 0 |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

4. Complete the following division sums and express the remainder as a whole number:
a. $8924 \div 23=$
b. $9558 \div 54=$

| 2 |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 2 | 3 | 9 | 2 | 4 |  |  |
|  |  |  |  |  |  |  |

| 5 | $4)$ | 9 | 5 | 5 | 8 |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |

5. Complete the following division sums and express the remainder as a whole number:
a. $1976 \div 83=$ $\qquad$ b. $2226 \div 47=$

|     |  | 3 |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

\left.|  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |$\right)$

## Challenge

1. Marker pens cost 69 p each. Shola has $£ 5$ to spend on buying as many as she can.
a. How many can she buy?
pens
b. How much change does she receive?
pence
2. One rack holds 28 CDs. Alisa has 183 CDs. How many racks does she need to hold all her CDs?
$\qquad$ racks
3. Write down one digit from each list to complete the following divisions.
a.

$\square$
$\square$

b. $\square$ 56
7
Digit $=$ $\qquad$
$\square$
Digit $=$

## In this task, you will:

- divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context.

Look at the examples and answer the questions. If you are anxious, try questions 1 6. If you're feeling confident, try questions 1-9. If you're raring to go, try the challenge too!

## Example 1

Judith cuts 5.1 metres of cotton into 24 equal lengths.
a. How long is each length in cm?
b. How much cotton is left over?

## Answers

$5.1 \mathrm{~m} \div 24$
Multiples of 24: $24,48,72,96,120$ and so on.

| 2 | 4 | 2 | 1 | r6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

a. Each length is $\mathbf{2 1} \mathbf{~ c m}$ long.
b. The remainder means 6 cm left over.

## Example 2

Work out $£ 871 \div 37$ giving your answer to the nearest pence ( 2 dp ).

## Answer

$871 \div 37$

| 3 | 7 | $\mathbf{2}$ | $\mathbf{3} \cdot \mathbf{5}$ | $\mathbf{4}$ | 0 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | 8 | ${ }^{87}$ | ${ }^{13} 1 \cdot{ }^{20} 0$ | ${ }^{15} 0$ | ${ }^{2} 0$ |

To find a decimal remainder, insert a decimal point and carry any remainder onto a zero (as shown above).
So $£ 871 \div 37=£ 23.54$
b. $884 \div 34=$

c. $1394 \div 41=$
d. $1323 \div 63=$ $\qquad$

|  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 4 | 1 | 1 | 3 | 9 | 4 |

2. Complete the following division sums and write a whole number remainder:
a. $403 \div 24=$ $\qquad$ b. $1216 \div 52=$

|  |  |
| :--- | :--- |
| 5 | 2 |

3. Complete the division sums and express the remainder as a decimal remainder:
a. $456 \div 32=$
b. $804 \div 48=$
$\qquad$

|  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 3 | 2 | 4 | 5 | 6 |  |  |  |

\left.|  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 4 | 8 |  |  |  |  |  |$\right) 8$ 0 | 4 |
| :--- |

4. Margo stacks 420 bricks into piles containing 15 bricks each. How many piles does she make?

5. Carlos buys 34 pairs of trainers for $£ 986$. How much did each pair cost?

6. A group of 58 people spent $£ 1972$ on tickets for a music festival. How much does one ticket cost?
$\square$
7. A courier delivers a class set of 29 books weighing 2407 kg to a local school. How much does each book weigh?

8. The organisers of a school fete sell 3888 cartons of drink on their stall. The drinks come in packs of 36 . How many packs did they sell?
$\square$
9. A charity raises $£ 3852$ from doing a sponsored run. Each runner paid $£ 18$ to enter. How many runners entered the race?

## Challenge

1. Birthday cards cost 79 p each. Freddy has $£ 5$. He buys as many cards as he can. Work out the amount of change Freddy should get from $£ 5$. Give your answer in pence.
$\square$
2. 600 pupils in a secondary school are travelling to their annual sports day. They take buses that carry 53 people when full.
How many buses are needed?
How many spare seats will there be?

## In this task, you will:

- perform mental calculations, including with mixed operations and large numbers.

Look at the examples and answer the questions. If you are anxious, try questions 1 4. If you're feeling confident, try questions 1-6. If you're raring to go, try the challenge too!

Example 1
Example 2

## Example 3

1. Using BODMAS, find the answers to the following sums:
a. $10-4 \times 2=$
b. $10-(4+2)=$
c. $10 \div 5+4 \times 2=$
d. $(10+2) \div 6=$
$\qquad$
2. Insert the following symbols, > (greater than), < (less than) or = (equals).

| a. $\quad(8-2)-2 \times 3$ |  | $0 \times 1 \times 2 \times 3 \times 4 \times 5$ |
| :--- | :--- | :--- |
| b. $\quad 100-5 \times 10$ |  | $2 \times 5 \times 5$ |
| c. $\quad 4+5 \times 6+7$ |  | $6 \times 7$ |
| d. $\quad(1+3)^{2}$ |  | $1+2+3+4+5$ |

3. Find the answer to the following sums:
a. $700,000+60,000+500+40+3=$ $\qquad$
b. $1,000,000+20,000+300+4=$ $\qquad$
4. If $78 \times 34=2652$, find the answer to the following sums:
a. $780 \times 3400=$ $\qquad$ b. $2,652,000 \div 780=$
$\qquad$
5. How much bigger is 60,435 than 14,503 ?
6. At a rugby ground, the four weeks in February had these attendances:

| Week 1 | Week 2 | Week 3 | Week 4 |
| :---: | :---: | :---: | :---: |
| 40,346 | 15,496 | 30,946 | 37,083 |

What was the total attendance for the whole of February?
$\square$

## Challenge

1. Using up to four 4 s , make sums with the following answers. An example is done for you.

| Question | Working | Answer |
| :--- | :--- | :---: |
| Example | $44 \div 4-4=11-4=7$ | 7 |
| a. |  | 5 |
| b. |  | 9 |
| c. |  | 20 |
| d. |  | 80 |

## In this task, you will:

- identify common factors, common multiples and prime numbers.

Look at the examples and answer the questions. If you are anxious, try questions 1 6. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

Example 1

## Example 2

Example 3

| Find all the factors of 30. | Write down two multiples of | 7 only has 2 factors as $1 \times 7=$ |
| :---: | :---: | :---: |
| Answer |  |  |
| We need to find pairs of numbers that multiply to give30, so | Answer | Which of these |
|  | $\begin{aligned} & 6,12,18,24,30,36,42,48 \\ & 54,60, \ldots \end{aligned}$ | 3343536373 |
| $1 \times 30$ | 8, 16, 24, 32, 40, 48, 56, 64, | Answer |
| $2 \times 15$ | $72,80, \ldots$ | $33=1 \times 33 ; 3 \times 11$ |
| $3 \times 10$ | Common multiples of 6 and 8 | $43=1 \times 43 ; 53=1 \times 53 ;$ |
| $5 \times 6$ | are 24 and 48. | $63=1 \times 63 ; 3 \times 21 ; 9 \times 7$ |
| tors of 30 are $1,2,3,5$ |  | $73=1 \times 73$. |
| $6,10,15 \text { and } 30 .$ |  | The prime numbers are 43 , 53 and 73. |

1. Write down all the factors of:
a. 10

b. 18

c. 36

2. Write down the first four multiples of:
a. 8
b. 9 $\qquad$
$\qquad$
C. 12 $\qquad$
$\qquad$
d. Write down any number that is a multiple of both 9 and 12 . $\qquad$

Resource 5 - identify common factors, common multiples and prime numbers
3. Here is a list of numbers

$$
\begin{array}{llllll}
3 & 13 & 16 & 29 & 36 & 48
\end{array}
$$

Choose any number from this list that is a:
a. Prime number
b. Multiple of 9
$\rightarrow$
c. Factor of 52
d. Common multiple of two other numbers in the list? $\rightarrow$
4. Write one number in each section of the Carroll diagram.

|  | 100 or less |  |
| :--- | :--- | :--- |
| Multiple of 30 |  |  |
|  |  |  |
| Multiple of 20 |  |  |
|  |  |  |

5. Write down two factors of 24 that are not factors of 12.
$\qquad$
6. Write down all the common multiples of 6 and 9 that are between 50 and 100.
$\qquad$
7. 376 is a multiple of 4 but not a multiple of 7 .

406 is a multiple of 7 but not a multiple of 4 .
Find a number that is between 376 and 402 that is a multiple of both 4 and 7.
$\qquad$
8. Write these numbers in the correct spaces on the diagram:

## 6

7 8

Resource 5 - identify common factors, common multiples and prime numbers

## Challenge

12 can be written in terms of factors as $2 \times 6$.
6 can be written in terms of factors as $2 \times 3$.
So $12=2 \times 2 \times 3$. These are called its prime factors as they are all prime numbers.

Find the prime factors of the following numbers.
a. 18
b. 50
d. 126

## In this task, you will:

- use their knowledge of the order of operations to carry out calculations involving the four operations.

Look at the examples and answer the questions. If you are anxious, try questions 1 6. If you're feeling confident, try questions 1-12. If you're raring to go, try the challenge too!

When sums have got different operations in them, we have to solve them in the correct order. We use a method called B O D M A S.

| $B$ | $=$ Brackets |
| :--- | :--- |
| $\mathbf{O}$ | $=$ Orders |
| D | $=$ Divide |
| $M$ | $=$ Multiply |
| $A$ | $=$ Add |
| S |  |$\quad$ Do the sums in this order

Example 1

## Example 2

Example 3
$4+3 \times 2$ (Multiply first)

$$
4+6=10
$$

(7-3) $\times 5$ (Brackets first)

$$
4 \times 5=20
$$

Using any of the numbers: $1,4,5$ and 7 , make a sum with the answer 34.
a. $5 \times 7-1=35-1=34$
b. $4 \times 7+5+1=28+6=34$
c. $4+(7-1) \times 5=4+6 \times 5=4+30=34$

Find the answers to the following:
Workings out and answer

| 1. $7-5+4$ |
| :--- |
| $2.5-7+4$ |
| $3.7 \times 3-2$ |
| $4.2 \times 6+3$ |
| $5.8 \div 2+5$ |
| $6.12 \div 2-3$ |
| $7.7+3 \times 4$ |
| $8.9-3 \times 2$ |
| $9.18-5 \times 3$ |
| $10.7+15 \div 5$ |
| $11 .(8-5) \times 4$ |
| $12 .(2+7) \div 3$ |

## Challenge

1. Insert brackets to make the following sums correct.

## Example:

$7 \times 3+1=28$ would become $7 \times(3+1)=7 \times 4=28$
Show your workings and answers.
a. $8 \times 4-2=16$
b. $12 \div 1+5=2$
C. $3+4 \times 5=35$
d. $4+2 \times 5-3=12$
e. $9-3 \times 2 \times 5=15$
2. Using any of the numbers: $2,5,6$ and 8 , find at least three ways to make a sum with the answer 30.

## In this task, you will:

- solve addition and subtraction multi-step problems in contexts, deciding which methods to use and why.

Look at the examples and answer the questions. If you are anxious, try questions 1 5. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

Example 1
Joe is trying to complete a football sticker book. It needs 270 stickers overall. He has 143 in the book and a further 69 ready to stick in. How many more stickers will he need?

## Answer

So far, $143+69=212$
How many more $=270-212=$ 58 needed

## Example 2

Place each of the numbers 1 to 5 in the $V$ shape so that the two arms of the V have the same total.

## Answer

The bottom number is used twice so remove this number and divide the remaining number sum by 2 .
$1+2+3+4+5=15$.
$15-1=14 ; 14 \div 2=7$
Therefore, $4+3+1=1+2+5$ (= 8);
$4+2+3=3+1+5(=9) ;$
and $4+1+5=5+2+3(=10)$.

1. A salesman has to travel 348 miles. In the first two hours he travelled 63 miles.

In the next three hours he travelled a further 94 miles. How much further does he have to travel?
$\square$
2. Use the operations + and - to make this calculation correct.

3. A baker has 1043 loaves of bread at the start of the day. In the morning, 593 loaves are sold and a further 396 loaves are sold in the afternoon.
How many loaves of bread are there left at the end of the day?
$\square$
4. In a garden centre, a rose plant costs $£ 6.48$, lily seeds cost $£ 1.95$ and daffodil bulbs cost 65 p each. Mavis buys a rose plant and five daffodil bulbs.
How much change does she get from a $£ 10$ note?

5. Circle the three numbers that total 100.
$\begin{array}{llllll}48 & 39 & 26 & 47 & 14 & 25\end{array}$
6. Write the missing digits to make this addition sum correct.

$4 \quad 0 \quad 5 \quad 2$
7. Keith bought a writing pad and a pen. He paid $£ 1.40$. Katy bought a writing pad and 2 pens. She paid $£ 1.95$.
Calculate the cost of a writing pad.

8. Use all the digits to complete the following sums:
a. 9, 2, 6 and 4
b. 3, 8, 5 and 4

## Challenge

The number in each triangle is equal to the sum of the numbers in the squares on either side. Find the missing numbers.
a.

b.

Resource 8 - addition, subtraction, multiplication and division problems

## In this task, you will:

- solve problems involving addition, subtraction, multiplication and division.

Look at the examples and answer the questions. If you are anxious, try questions 15. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

Example 1
A bag of 5 apples costs $£ 1$.
A box of 4 melons costs $£ 2.10$. How much more does one melon cost than one apple?

## Answer

One apple costs 100p $\div 5=20$ p
One melon costs 210p $\div 4=55 p$ $55 p-20 p=35 p$ more.

## Example 2

1. A waiter and a waitress earned tips during a day while working in a restaurant. The waiter received $£ 28$ and the waitress received $£ 37$. They agree to share the tips. How much will they both get?
$\square$
2. I bought 3 pears at 49p each and 2 drinks at $£ 1.14$ each.

How much did I spend altogether?
What change would I get by paying for the items with a $£ 5$ note?

Resource 8 - addition, subtraction, multiplication and division problems
3. A farmer had 370 eggs. 18 smashed so he put the rest into boxes of 15 . How many boxes did he use?

4. Rose bushes cost $£ 12.95$ each. If you buy three rose bushes, you pay $£ 30$. How much money do you save through this offer?

5. Jules has read 197 pages of a 648 page book. How many pages must he read until he reaches the middle of the book?
$\square$
6. In the following grids, each number is the product of the two numbers which lie directly beneath it.
Complete each grid.
a.

b.

7. At a primary school there are 238 pupils. One cold day in January, 17 pupils were absent and 13 pupils decided to go home for lunch. The remainder stayed for school lunch. Of these staying pupils, three times as many had a hot meal than had a packed lunch. How many pupils had a hot meal for lunch?

Resource 8 - addition, subtraction, multiplication and division problems
8. Erica thinks of a number.

She doubles this number and then adds thirteen.
She divides this result by five and is left with the number seven. What number did Erica start with?

## Challenge

1. Michael has twice as much money as Trisha. When Michael spends $£ 75$ and Trisha has spent $£ 20$, they both have the same amount left. How much money did Michael have at first?

## In this task, you will:

- use estimation to check answers to calculations and determine, in context of a problem, an appropriate degree of accuracy
- identify the value of each digit given to three decimal places and multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places.

Look at the examples and answer the questions. If you are anxious, try questions 16. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

Example 1

## Example 2

A school wants to buy 23,486 pencils. They come in boxes of 64. Approximately how many boxes will they buy?

Answer
$24,486 \div 64 \approx 24,00 \varnothing \div 60$
$\approx 2400 \div 6=400$ boxes

Joe saves 30 pence every day for a year. He estimates that he will have approximately saved $£ 110$. Is he right?

## Answer

$365 \times 30 \approx 400 \times 30$
$\approx 12,000 p=£ 120$, so yes

1. 34 boxes contain 18 apples each.

Circle the best estimate that shows the total number of apples.
a. 400
b. 500
c. 600
d. 800
2. There are 342 children going to the theatre. The theatre can seat up to 22 children in each row. Circle the best estimate to show how many rows will be filled.
a. 10
b. 15
c. 20
d. 25
3. Suzie buys 54 chews at 16 pence each. Roughly, how much does she spend?
$\square$
4. Carol has 42 boxes of toys with a total weight of 197 kg . What is the approximate weight of each box?

|  |
| :---: |
|  |
|  |
|  |

5. Complete the following table. The first row has been done for you.

|  | Question | Rounding | Estimate |  |
| :---: | :---: | :---: | :---: | :---: |
| e.g. <br> a. | $19 \times 241$ | $20 \times 200$ | 4000 | 4579 |
|  | $15,463+8946$ |  |  |  |
| b. | $7631-2814$ |  |  |  |
| c. | $78 \times 437$ |  |  |  |
| d. | $5632 \div 32$ |  |  |  |

6. Complete the following table:

| $\times 1000 \times 100$ | Number |  | $\div 10$ | $\div 100$ |
| :---: | :---: | :---: | :---: | :---: |
|  | 42 |  |  |  |
|  | 6.75 |  |  |  |
| 2300 |  |  |  |  |
|  |  |  | 6 |  |
|  |  |  |  | 0.45 |

7. Every week, 2392 new patients are admitted to a hospital. Estimate how many patients visited the hospital during 2018.

8. Using any of the digits $3,6,7$ and 8 once only in each number, write:
a. the number that is closest to 500 .
b. the value of the hundreds digit in the answer when the largest 3 -digit odd number is multiplied by 10.
c. the value of digit 7 in the smallest 4 -digit number when it is divided by 1000.

## Challenge

Two whole numbers are each rounded to the nearest 10. The sum of the rounded numbers is 80 .
Work out the maximum possible sum ofthe original two
 numbers.

## In this task, you will:

- use common factors to simplify fractions; use common multiples to express fractions in the same denomination - compare and order fractions, including fractions > 1.

Look at the examples and answer the questions. If you are anxious, try questions 15. If you're feeling confident, try questions 1-7. If you're raring to go, try the challenge too!

## Example:

Circle the fraction that is greater than $\frac{1}{2}$ and less than $\frac{3}{4}$.

| $\frac{2}{5}$ | $\frac{7}{8}$ | $\frac{1}{3}$ | $\frac{5}{8}$ | $\frac{3}{6}$ |
| :---: | :---: | :---: | :---: | :---: |

To work this out, we can create equivalent fractions by simply building up fraction tables using our times table knowledge:

$$
\frac{3}{4}=\frac{6}{8}=\frac{9}{12}=\frac{12}{16}=\frac{15}{20}
$$

or taking each fraction in turn:
$\frac{2}{5}=\frac{4}{10}=$ so $<\frac{5}{10}\left(\frac{1}{2}\right) ; \quad$ X $\quad \frac{7}{8}<\frac{6}{8}\left(\frac{3}{4}\right) ; \quad$ X $\quad \frac{1}{3}\left(\frac{4}{12}\right)<\frac{1}{2}\left(\frac{6}{12}\right)$; $\frac{5}{8}$ is between $\frac{4}{8}$ and $\frac{6}{8} ; \quad \frac{3}{6}=\frac{1}{2} \quad$ X

1. Write four equivalent fractions to the given one below using fraction tables.
a. $\frac{2}{5}=\frac{4}{\square}=\frac{\square}{15}=\frac{\square}{\square}=\frac{\square}{\square}$
b. $\frac{3}{8}=\frac{\square}{\square}=\frac{\square}{24}=\frac{\square}{\square}=\frac{\square}{40}$
c. $\frac{5}{6}=$

$=\frac{\square}{18}=$

2. Write four equivalent fractions to the given one below using fraction tables.
a. $\frac{2}{5}=\frac{4}{\square}$
b. $\frac{2}{3}=\frac{\square}{12}$
c. $\frac{5}{6}=\frac{20}{\square}$
d. $\frac{2}{7}=\frac{10}{\square}$
3. Circle the larger fraction.
a. $\frac{2}{3}$ or $\frac{3}{4}$
b. $\frac{5}{6}$ or $\frac{7}{9}$
4. Write these fractions in order of size starting with the smallest.
$\frac{7}{12}$
$\frac{3}{4}$
$\frac{5}{6}$
$\frac{1}{2}$
$\frac{2}{3}$
Smallest, $\ldots . . . . .$, ........, ........, ........, ........., Largest
5. Write in the missing values.
a. $\frac{2}{3}=\frac{\square}{18}=\frac{10}{\square}$
b. $\frac{\square}{8}=\frac{9}{24}=\frac{6}{\square}$
6. Insert the following symbols: >, < or =.

| a. | $\frac{7}{2}$ |  | $3 \frac{1}{2}$ |
| :--- | :---: | :--- | :---: |
| b. | $\frac{9}{10}$ |  | $\frac{4}{5}$ |
| c. | $1 \frac{1}{3}$ |  | $1 \frac{1}{6}$ |
| d. | $\frac{5}{12}$ |  | $\frac{3}{8}$ |

7. Choose from the following numbers to make each pair of fractions equivalent:
315
$6 \quad 20$
18
5
a.

b.

c.

## Challenge

Complete the following equivalent fraction equations:

1. a. $\frac{\square}{12}=\frac{20}{48}=\frac{10}{\square}$
b. $\frac{10}{\square}=\frac{\square}{24}=\frac{5}{4}$

## In this task, you will:

- add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.

Look at the examples and answer the questions. If you are anxious, try questions 1 4. If you're feeling confident, try questions 1-7. If you're raring to go, try the challenge too!

## Example

Find equivalent fractions by setting up a number (counting) sequence for both the numerator and denominator.

$$
\frac{3}{8}=\frac{6}{16}=\frac{9}{24}=\frac{12}{32}=\frac{15}{40} \quad \begin{aligned}
& \text { The sequence shows the numerator ascending in } 3 \mathrm{~s} \\
& \text { and the denominator ascending in } 8 \mathrm{~s} .
\end{aligned}
$$

Find the common denominator:

| $\frac{5}{8}+\frac{1}{6}$ | $\frac{5}{8}=\frac{10}{16}=\left(\frac{15}{24}=\frac{20}{32}=\frac{25}{40}\right.$ |
| :--- | :--- |
| $\frac{15}{24}+\frac{4}{24}=\frac{19}{24}$ | $\frac{1}{6}=\frac{2}{12}=\frac{3}{18}=\left(\frac{4}{24}=\frac{5}{30}\right.$ |

1. Find the common denominator to solve these addition sums.
a. $\frac{1}{4}+\frac{3}{8}=$
b. $\frac{1}{3}+\frac{4}{9}=$
2. Find the common denominator to solve these subtraction sums.
a. $\frac{5}{6}-\frac{1}{3}=$
b. $\frac{7}{12}-\frac{1}{4}=$
3. Complete the following fraction sums.
a. $\frac{3}{4}+\frac{1}{6}=$
b. $\frac{3}{8}+\frac{5}{12}=$
c. $\frac{4}{9}-\frac{1}{6}=$
d. $\frac{11}{12}-\frac{5}{8}=$
4. Jack and Sarah share a pizza. Jack has $\frac{5}{8}$ and Sarah has $\frac{1}{8}$ of the pizza. How much of the pizza have they eaten altogether?
$\square \ldots \ldots . . . . . .$.

What fraction is left over?

5. Find the common denominator to solve these subtraction sums.
a. $\frac{1}{8}+\frac{5}{12}=$
b. $\frac{5}{9}+\frac{1}{6}=$
c. $\frac{7}{9}-\frac{5}{12}=$
d. $\frac{11}{12}-\frac{7}{8}=$
6. Paula, Freda and Judith share a large bar of chocolate.

Paula has $\frac{5}{12}$ and Freda has $\frac{1}{4}$.
What fraction of the chocolate is left for Judith?
$\square$
7. Stevie swam $\frac{7}{12}$ of a mile on a Tuesday and $\frac{3}{8}$ of a mile on a Thursday. How much further did he swim on the Tuesday than on the Thursday?

## Challenge

1. Complete the following mixed number calculations.
a. $3 \frac{4}{9}+2 \frac{5}{12}=$
b. $7 \frac{11}{12}-3 \frac{7}{8}=$
2. Julie wants to wrap string around a large box. She has 5 metres of ribbon. How much string is left over? Give your answer as a fraction.

## In this task, you will:

- multiply simple pairs of proper fractions, writing the answer in its simplest form.

Look at the examples and answer the questions. If you are anxious, try questions 15. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

## Example 2

Work out $\frac{3}{8} \times \frac{5}{6}$.

## Answer

Multiply numerators
and denominators $\frac{3 \times 5}{8 \times 6}=\frac{15}{48}$
Simplify fraction $\frac{15}{48}=\begin{aligned} & \div 3 \\ & \div 3\end{aligned}=\frac{5}{16}$

Find $\frac{5}{6}$ of $£ 27$.

## Answer

Remember 'of' means multiply.
Create two fractions: $\frac{5}{6} \times \frac{27}{1}=\frac{5 \times 27}{6 \times 1}=\frac{135}{6}$
Simplify: $\frac{135}{6}=\begin{aligned} & \div 3 \\ & \div 3\end{aligned}=\frac{45}{2}$
Now the decimal division $45 \div 2=£ 22.50$

1. Work out these multiplication sums.
a. $\frac{3}{4} \times \frac{1}{2}=$
b. $\frac{5}{8} \times \frac{3}{4}=$
C. $\frac{1}{5} \times \frac{4}{5}=$
$\qquad$
2. Complete these multiplication sums simplifying your answers.
a. $\frac{5}{8} \times \frac{2}{3}=$
b. $\frac{5}{6} \times \frac{3}{4}=$
C. $\frac{1}{4} \times \frac{8}{9}=$
$\qquad$
3. Calculate the following:
a. $\frac{2}{3}$ of $£ 18=$
b. $\frac{3}{5}$ of $£ 25=$
C. $\frac{3}{8}$ of $£ 48=$
4. Match up these calculations to their correct answer.

| $\frac{11}{12} \times \frac{4}{5}$ |
| :---: |
| $\frac{7}{8} \times \frac{2}{3}$ |
| $\frac{3}{10} \times \frac{5}{6}$ |
| $\frac{1}{2} \times \frac{3}{4}$ |

| $\frac{1}{4}$ |
| :---: |
| $\frac{11}{15}$ |
| $\frac{7}{12}$ |
| $\frac{3}{8}$ |

5. Complete these multiplication sums simplifying your answers.
a. $\frac{5}{8} \times \frac{6}{7}=$
b. $\frac{5}{9} \times \frac{6}{7}=$
c. $\frac{5}{8} \times \frac{4}{15}=$
6. $\frac{2}{5}$ of my friends go to the cinema every weekend. Half of them are boys. What fraction of my friends are boys?
$\square$
7. There was $\frac{7}{12}$ of a pie left in the fridge. Jade ate $\frac{3}{4}$ of the leftover pie. How much of the pie did she eat?
8. Complete these multiplication sums simplifying your answers.
a. $\frac{5}{8}$ of $£ 44=$
b. $\frac{3}{4}$ of $£ 54=$
c. $\frac{7}{12}$ of $£ 30=$

## Challenge

1. Complete these multiplication sums simplifying your answers.
a. $\frac{5}{8} \times \frac{2}{3}$
b. $\frac{7}{9} \times \frac{3}{4}=$
c. $\frac{3}{4} \times \frac{11}{18}=$
2. Complete the following mixed number calculations.
a. $\frac{1}{2} \times \frac{2}{3} \times \frac{3}{4} \times \frac{4}{5}=$
b. $1 \frac{1}{4} \times 1 \frac{1}{5}=$
(Tip: change to improper fractions first.)

Resource 4 - divide fractions by whole numbers

## In this task, you will:

- divide proper fractions by whole numbers
- associate a fraction with division and calculate decimal fraction equivalents for a simple fraction.

Look at the examples and answer the questions. If you are anxious, try questions 15. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

## Example 1

Example 2

| Work out $\frac{3}{4} \div 5$. |
| :--- |

Cut the bar into 5 equal horizontal bars. Count those shaded in the first bar. This is the numerator (3). The denominator is all the sections together (20).
Answer $\frac{3}{20}$ as $\frac{3}{4} \div \frac{5}{1}=\frac{3}{4} \times \frac{1}{5}=\frac{3}{20}$

Which is larger $\frac{3}{8}$ or 0.38 ?

## Answer

Change the fraction to a decimal using short division $(3 \div 8)$.

|  | 0 | $\bullet 3$ | 7 | $(5)$ |
| :--- | :--- | :--- | :--- | :--- |
| 8 | 3 | $\bullet^{3} 0$ | ${ }^{6} 0$ | ${ }^{4}(0)$ |

$\frac{3}{8}=0.37 \mathrm{r} 4\left(\frac{3}{8}=0.375\right)$ for the complete division. This is less than 0.38 !
0.38 is greater.

1. Work out the following divisions. You may use the grids to help you.
a. $\frac{2}{3} \div 5=$
b. $\frac{3}{5} \div 2=$
c. $\frac{4}{5} \times 3=$

2. Complete these divisions. You can draw grids to help you.
a. $\frac{3}{4} \div 2=$
b. $\frac{1}{2} \div 3=$
c. $\frac{5}{6} \div 3=$
3. Change the following fractions to decimals.
a. $\frac{3}{4}=$
b. $\frac{4}{5}=$
C. $\frac{5}{8}=$
4. Match each fraction to its equivalent decimal number. One has been done for you.

| $\frac{1}{4}$ |  |
| :---: | :---: |
| $\frac{1}{2}$ |  |
| $\frac{2}{5}$ |  |
| $\frac{3}{10}$ | 0.5 |
|  | 0.3 |

5. Write these in order of size, starting with the smallest.
$\frac{2}{5}$
0.3
$\frac{1}{3}$
0.28
$\frac{3}{8}$

| Smallest | $\ldots \ldots . .$. | $\ldots \ldots .$. | $\ldots \ldots .$. | $\ldots \ldots .$. | $\ldots . . .$. | Largest |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

6. Complete these divisions. Write your answers as fractions in their simplest forms.
a. $\frac{4}{5} \div 2=$
b. $\frac{5}{6} \div 10=$
C. $\frac{9}{10} \div 6=$
$\qquad$
7. Write the following as decimals.
a. $\frac{7}{8}=$
b. $\frac{1}{6}=$
c. $1 \frac{1}{4}=$
8. Kevin has $£ 5$ in his pocket and wants to share it equally between himself and five of his friends. He says that they will get 83 pence each as $£ 5 \div 6=£ 0.83$
Using division, can you show that he is correct?

## Challenge

1. Josie has $\frac{3}{4}$ of a metre of string. She wants to cut it into six equal lengths. How long will each length be? Write your answer in centimetres.

## In this task, you will:

- multiply one-digit numbers with up to 2 decimal places by whole numbers.

Look at the examples and answer the questions. If you are anxious, try questions 15. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

## Example 1

Example 2
Find the missing number.

## Answer

Ignoring the decimal point, we can say $3 \times 5=15$ (or $15 \div 5=3$ )
The answer must be ten times smallers as there is only one decimal place (one number after the decimal point).
So the missing answer is 0.3.

Since $£ 40.47$ is more than $£ 40$, Emma does not have enough money.

1. Complete the following multiplications. You can use the grids to help you.
a. $26.4 \times 7$
b. $73.1 \times 4$

a. $7.86 \times 5$

b. $14.67 \times 6$

2. Complete the following multiplications. You can use the grids to help you.
a. $37.82 \times 8$
b. $184.5 \times 9$

|  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $\times$ |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |

3. Answer the following questions.
a. Dane buys seven tickets costing $£ 2.85$ each. How much did he pay altogether?

b. Paula travels 9.73 miles every day. How far does she travel over four days?

4. A football shirt costs $£ 32.69$. If a five-a-side team need to buy some new shirts, how much will it cost them?

5. Answer the following questions:
a.

|  | $\times$ | 4 | $=1.2$ |
| :--- | :--- | :--- | :--- | :--- |

b.

|  | $\times$ | 9 | $=$ | 10.8 |
| :--- | :--- | :--- | :--- | :--- |

6. Complete the following multiplications. You can use the grids to help you.
a. $437.8 \times 8$
b. $384.75 \times 9$

|  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $\times$ |  |  |  |  |  |
|  |  |  |  |  |  |

7. Stuart saves $£ 283.57$ every year. How much money does Stuart save over four years?

8. Karen bought seven cans of dog food for $£ 1.99$ each and four tins of cat food for $£ 1.38$ each. What was the total amount she spent?

## Challenge

1. Fill in the gaps:
a.

| 0.08 | $\times$ |  | $=0.48$ |
| :--- | :--- | :--- | :--- | :--- |

b.

|  | $\times$ | 5 | $=$ | 4.3 |
| :--- | :--- | :--- | :--- | :--- |

## In this task, you will:

- use written division methods in cases where the answer has up to two decimal places
- solve problems which require answers to be rounded to specified degrees of accuracy.

Look at the examples and answer the questions. If you are anxious, try questions 15. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

## Example 1

## Example 2

Jimmy has nine weeks to save up $£ 350$ for his holiday.
To the nearest penny, how much should he save each week?

Answer: $£ 350 \div 9$

|  | 0 | 3 | 8 | $\bullet$ | 8 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 9 | 3 | 3 | 8 | ${ }^{8} 0$ | $\bullet$ |
| 80 | ${ }^{8} 0$ |  |  |  |  |

For the nearest penny (2dp) look at the third decimal place.
If the number is five or more then we round up, so the weekly savings are £38.89.

1. Calculate the following, giving answers up to 2 decimal places:
a. $25 \div 4=$

b. $51 \div 4=$
c. $40 \div 3=$

2. Calculate the following, giving answers up to 2 decimal places:
a. $43 \div 6=$
b. $53 \div 8=$
c. $61 \div 7=$

3. Calculate the following, giving answers up to 2 decimal places.
a. $79 \div 5$
b. $79 \div 8$

4. Julian is training for a race. He needs to reach 100 miles over 7 weeks. How much does he have to run each week to compete this? Write your answer to the nearest mile.

5. Write in the missing numbers to complete the following sequences.
a. $140 \div 8$
b. $215 \div 9$
C. $341 \div 7$
6. Six friends go out to share a meal at a restaurant. The bill comes to $£ 54.42$. They share the cost equally. How much do they each pay?

7. Erica wants to complete a 16-mile training run in three hours.
a. To the nearest mile, how far should she run each hour?
$\square$
b. Erica decides to round up. Explain why she did that.
$\square$

## Resource 6 - written division methods up to two decimal places

8. Three shops sell packets of balloons in different sizes as shown.

| Billy’s | Judy’s | Smith's |
| :---: | :---: | :---: |
| 3 packets for $£ 4$ | 7 packets for $£ 9$ | 9 packets for $£ 11.75$ |

Which shop give the best value?

## Challenge

1. A highland bike race consists of 6 laps. The total distance of the race is $391 / 2$ miles. How far is one lap (to the nearest hundredth of a mile)?

2. A Complete the following division sum in two different ways.

## In this task, you will:

- recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.

Look at the examples and answer the questions. If you are anxious, try questions 14. If you're feeling confident, try questions 1-6. If you're raring to go, try the challenge too!

## Example 1

## Example 2

Write the following amounts in ascending order starting with the smallest.
$0.5 \quad \frac{2}{5} \quad 42 \% \quad \frac{11}{20}$

## Answer

Change everything to either decimals or percentages.
$0.5=0.5 \times 100=50 \%$;
$\frac{2}{5}=2 \div 50.4=40 \% ; 42 \%=42 \%$;
$\frac{11}{20}=\frac{22}{40}=\frac{33}{60}=\frac{44}{80}=\frac{55}{100}=55 \%\left({ }^{\prime} \times\right.$ by 5 ')
Smallest: $\frac{2}{5}, 42 \%, 0.5, \frac{11}{20}$ largest

1. Look at the diagrams below. Write down the percentage the shading represents in each diagram.
a.

\%
b.

c.

d. \% e.
\%

|  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |

\%
Answer
$\frac{17}{25}=\frac{34}{50}=\frac{51}{75}=\frac{51}{75}=\frac{68}{100}=68 \%$
This is less than $71 \%$.
$71 \%$ is larger.

Resource 7 - use equivalences between fractions, decimals and percentages
2. Complete the following table:

| Diagram Fraction |  | Decimal |  |
| :---: | :---: | :---: | :---: |
|  |  | $\frac{1}{4}$ |  |
|  |  |  |  |
|  |  | 0.3 |  |
|  |  |  |  |
|  |  |  | $45 \%$ |

3. Arrange these quantities in order of size starting with the smallest.
0.21
$\frac{1}{4}$
30\%
$\frac{1}{2}$
$\frac{2}{5}$

Smallest, ........., ........, ......., ........, ......., Largest
4. Circle the larger value.
a. $\frac{3}{4}$ or 0.35
b. 0.25 or $7 \%$
c. $\frac{7}{8}=$ or $81 \%$
5. Find the matching pairs. The first one is done for you.

| $50 \%$ of 8 | 30\% |
| :---: | :---: |
|  | 0.7 |
| $\frac{3}{10}$ | $\frac{1}{4}$ of 16 |
| $\frac{1}{5}$ of 15 | $\frac{18}{25}$ |
| 72\% | 60\% |
| $\frac{3}{5}$ | 0.5 |
| $\frac{3}{5}+\frac{1}{10}$ | 3 |

6. Write the following amounts in ascending order, starting with the smallest.
$\frac{1}{3}$
0.37
30\%
0.073
$\frac{1}{4}$
29.5 \%
```
Smallest ........, ......., ......., ......., ......., ......., Largest
```

## Challenge

1. Jean has 70 bottles of pop to sell one weekend. She wants to sell $60 \%$ of the bottles by Saturday night.
a. Shade in the grid to represent this sale of $60 \%$.

b. Use the grid to help you find how many bottles she has left to sell on Sunday.

## Section 2:

## Ratio and proportion

## In this task, you will:

- solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts.

Look at the examples and answer the questions. If you are anxious, try questions 15. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

## Example

Orange paint is made by mixing red and yellow paint. For every 2 parts of red paint you would use 3 parts of yellow. This is a ratio of 2:3.
a. MrAce wants to make 20 tins of orange paint. How much red and yellow paint will he need?
b. Mrs Ure has 16 litres of red paint. How much yellow paint would she need to add to make orange paint?
a. Build up the ratio table by counting up each table for red and yellow.
Red : Yellow
2 : 3
4 : 6
6 : 9
$8: 12$ this adds to 20 !
10 : 15
He needs 8 tins of red paint and 12 tins of yellow paint.
b. Build up the ratio table by counting up each table for red and yellow.
Red : Yellow
2 : 3
4 : 6
6 : 9
$8: 12$ this adds to 20 !
10: 15
He needs 8 tins of red paint and 12 tins of yellow paint.

1. Use ratio tables to share the following quantities into the given ratio.
a. $£ 25$ into $2: 3$ $\square$ b. 30 into $1: 4$ $\square$ C. 40 into $3: 5$ $\square$
2. Use ratio tables to share the following quantities into the given ratio.
a. $£ 56$ into $2: 5$ $\square$ b. $£ 66$ into $6: 5$ $\square$
3. A box of chocolates contains 7 milk chocolates and 4 dark chocolates. Judy buys three boxes. How many milk chocolates will she have altogether?
4. Builder Joe made up a cement mixture by mixing 3 bags of sand for every bag of cement. To build a wall, he needs 12 bags of sand. How many bags of cement will he need?
5. To make 5 scones it takes 2 cups of cheese for every 3 cups of butter.
a. How many cups of butter will be needed for 35 scones?
cups of butter
b. Ashton makes similar scones. He has 27 cups of butter available. How many cups of cheese will he need?

6. A necklace is made by linking purple and orange beads. Suzanne makes a necklace like the one below.

a. She decides to make 7 for her friends. How many purple beads will she need?
$\square$
b. For Christmas, Suzanne buys 45 purple beads. How many orange beads will she need, and how many necklaces will she be able to make?
orange beads, necklaces
7. Two small pizzas cost $£ 11$. Find the cost of 9 small pizzas.
8. Six tickets for a children’s play pool cost $£ 27$. Calculate the cost of four tickets.
$\square$

## Challenge

1. Every 100 g of 'toasty' white bread contains 4.5 grams of fibre. In a large loaf weighing 800 grams, there are 18 slices of bread.
How much fibre is there in three slices of bread?

## In this task, you will:

- solve problems involving the calculation of percentages and the use of percentages for comparison.

Look at the examples and answer the questions. If you are anxious, try questions 18. If you're feeling confident, try questions 1-11. If you're raring to go, try the challenge too!

| Example 1 | Example 2 | Example3 |
| :---: | :---: | :---: |
| A class contains 18 boys and 12 girls. What percentage of the class are boys? <br> Answer <br> Total $=18+12=30$ <br> Fraction boys $=\frac{18}{30}$ <br> We need to make this a fraction with a denominator of 100: $\frac{18}{30}=\frac{3}{10}=\frac{30}{100}=30 \%$ | $25 \%$ of the pears in a box are large. The rest are small. There are 13 large pears. How many small pears are there? <br> Answer <br> We need to know what <br> $100 \%$ is, so:. <br> $25 \%=13$ <br> $50 \%=26$ <br> $75 \%=39$ <br> $100 \%=52[13 \times 4]$ <br> Small pears $=52-13=39$ <br> (small $=75 \%=13 \times 3=39$ ) | Find $35 \%$ of $£ 8$. <br> Answer <br> We always find 10\% first ( $\div 10$ ). <br> $10 \%$ of $£ 8=£ 8 \div 10=£ 0.80$ <br> $5 \%$ of $£ 8=£ 0.80 \div 2=$ <br> £0.40 <br> So $35 \%=10 \%+10 \%+10 \%$ + <br> 5\% <br> $=£ 0.80+£ 0.80+$ <br> £0.80 + £0.40 <br> $=£ 2.80$ $(0.35 \times £ 8=£ 2.80)$ |

1. Write the following fractions as percentages:
a. $\frac{9}{20}$ $\qquad$ b. $\frac{9}{30}$
.............\%
C. $\frac{9}{60}$
$\ldots . . . . . . . \%$
2. There are 13 black and 7 white disks in a bag. What percentage are black disks?
$\square$

Resource 2 - calculations of percentages
3. Jamie had $£ 40$. He spent $£ 12$ on a DVD. What percentage of his money did he spend on the DVD?
4. Work out the following sums:
a. $20 \%$ of $£ 30$
£ ........
b. $15 \%$ of $£ 8$
£.......
c. $35 \%$ of $£ 40$
£.......
5. If $10 \%$ of a number is 7 , what is the number?
$\square$
6. If 9 is $20 \%$ of a number, what is the number?
$\square$
7. A jacket costing $£ 60$ is reduced by $20 \%$ in a sale.
a. How much was the jacket reduced in the sale?
$\square$
b. How much was the final sale price?

8. Orange squash is made with one part cordial and four parts water. a. What fraction of the squash is cordial?
$\qquad$
b. What percentage of the squash is water?

9. If $15 \%$ of a number is 30 , what is $100 \%$ ?
$\square$
10. Use ratio tables to share the following quantities into the given ratio.
a. $60 \%$ of $24=20 \%$ of $\square$ b. $12 \%$ of $36=$ $\square$ \% of 6
11. Darren sees a crazy offer in an advert:

Which offer should he go for?

Offer B
Eat $25 \%$ of 7 pizzas

Offer:

## Challenge

1. A golf club has 400 members. $65 \%$ of the members are male. $25 \%$ of the female members are children.
a. How many male members are in the golf club?
$\square$
b. How many female children are in the club?
$\square$

## In this task, you will:

- solve problems involving similar shapes where the scale factor is known or can be found.

Look at the examples and answer the questions. If you are anxious, try questions 16. If you're feeling confident, try questions 1-10. If you're raring to go, try the challenge too!

## Example 1

## Example 2

Look at these similar shapes.
a. Find the scale factor for the enlargement.
b. Find the length of the side marked $\boldsymbol{x}$.

## Answer

a. Scale factor $=10 \div 5=2$
b. $x=3 \times 2=6 \mathrm{~cm}$

1. A pen and a pencil cost 60 pence. If the pen cost twice as much as the pencil, find the cost of the pen.
$\square$
2. If 2 pens cost 80 pence, what do 3 pens cost?
$\square$
3. Larry made a scale drawing of a flat. The scale of the drawing is $1 \mathrm{~cm}: 2 \mathrm{~m}$. The kitchen is 3 centimetres in the drawing. How long is the actual kitchen?
4. Lola makes a scale drawing of a bungalow. The side of the bungalow is 12 metres wide in real life and is 3 centimetres wide in the drawing. What is the scale of the drawing?
$\square$
5. Complete the following multiplications. You can use the grids to help you.
a. Scale factor $\qquad$ b. Scale factor
c. Scale factor

6. Complete these enlargements using the given scale factor.
a. Scale factor $=3$
b. Scale factor $=2$
c. Scale factor $=2$

7. The distance from $A$ to $B$ is three times as far as from $B$ to $C$. The distance from $A$ to C is 80 kilometres. Calculate the distance from A to B .
$\square$
8. An apple and blackberry pie requires three times as much apple than blackberry. The total weight of apples and blackberries in the pie is 220 grams. How much apple is there in the pie?
9. A scale drawing is made of a local park. 1 cm on the drawing represents 20 metres on the ground. One path is 7 cm long on the drawing. What is the actual length?
$\square$
10. Find the lengths of the side marked $\boldsymbol{x}$ in these similar shapes.
a. $\boldsymbol{x}$ $\qquad$ b. $x$...................

8 m

## Challenge

1. Complete the following enlargements.
a. Scale factor $=2$
b. Scale factor $=3$

Resource 4 - unequal sharing

## In this task, you will:

- solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.

Look at the examples and answer the questions. If you are anxious, try questions 16. If you're feeling confident, try questions 1-9. If you're raring to go, try the challenge too!

## Example 1

## Example 2

Joe is 14 years older than Marie. Their combined age is 40 years old in total. How old is Joe?

## Answer

Take off Joe's extra 14 years, so 40-14 $=26$
If Joe and Marie now add to 26, then
Marie $=26 \div 2=13$
So Joe = 13 + 14 = 27 years old

Mr. Tobin spends $\frac{2}{5}$ of her money shopping at a supermarket. She now has $£ 24$ left.
How much did she have to start with?

## Answer

Is she spends $\frac{2}{5}$, then she has $1-\frac{2}{5}=\frac{3}{5}$ left.
If $\frac{3}{5}$, or 3 parts $=£ 24$,
Then $\frac{1}{5}$, or 1 part $=£ 24 \div 3=£ 8$
So $\frac{5}{5}$, or 5 parts (whole) $=5 \times £ 8=£ 40$

1. Erica and Joseph have some marbles. Erica has 8 more marbles than Joseph. If they have 34 marbles together, how many marbles does Erica have?
2. A 16 metre length of string is cut into two pieces. One piece is 6 metres longer than the other, what is the length of the smaller piece of string?

The smaller length is $\qquad$
3. There are 33 oranges in a box. Beth and Clive share them out. For every two that Beth gets, Clive gets one. How many oranges do they each get?
$\qquad$
4. A bag contains red and blue balls. Three-quarters of the balls are blue and there are five red balls. How many balls are there altogether?
$\square$
5. Here is a recipe to make pancakes.
a. Julie has 60 grams of flour. How many pancakes can she make?

6. Alex and Keith are playing Top Trumps. There are 32 cards in a pack. At the end of a game, Alex wins with 6 more cards than Keith. How many cards did Alex end up with?

Alex had
cards
7. Thomas has a bag of sweets. He gives 5 sweets to his friend and eats one third of the remainder himself. If he has 16 sweets left, how many sweets were there in the bag at the start?
8. A teaching assistant is checking the quality of coloured pencils. She finds that $\frac{5}{8}$ of the pencils are good but throws away 42 pencils. How many pencils did she check?
$\square$
9. Hens can lay eggs in three sizes: small, medium and large. $\frac{2}{3}$ of the eggs laid are medium and the remaining eggs are equally small or large. If 8 of the eggs laid during one week are small, how many eggs were laid altogether?
$\square$

## Challenge

1. A DIY shop stocks three popular colours of paint: blue, red and white. The owner likes to keep between 175 and 185 tins of paint. $\frac{2}{9}$ of the paint is blue. For every two tins of blue there are three tins of red. How many tins of each colour will he have in stock?
$\square$

## Section 3: <br> Algebra

## In this task, you will:

## - use simple formulae.

Look at the examples and answer the questions. If you are anxious, try questions 1 5. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

## Example 1

An electrician charges $£ 25$ per hour plus a call-out fee of $£ 30$.
a. Using $\mathbf{T}$ for the total cost and $\mathbf{H}$ for the hours worked, write a formula for the cost of calling out the electrician.
b. How much did he charge for 4 hours of work?

## Answer

a. Total cost $=£ 30+25 \times$ number of hours

Formula, $\mathrm{T}=30+25 \times \mathrm{H}$

$$
\mathrm{T}=30+25 \mathrm{H}
$$

b. Let $\mathrm{H}=4 ; \mathrm{T}=30+25 \times 4$

$$
=30+100=£ 130
$$

## Example 2

Alicia is $b$ years of age. Bruce is five years older than Alicia.
a. Write an expression for Bruce's age.
b. Their total age comes to 37 years old. Write an equation in terms of $b$ and find Bruce's age.

## Answer

a. '5 more' means add 5 .

Bruce is ' $b+5$ ' years of age.
b. Alicia + Bruce $=37$
$b+b+5=37$
$2 b+5=37 \ldots$... '- 5' from both sides

$$
2 b=32 \ldots ‘ \div 2 \prime
$$

$$
b=16
$$

So, Bruce is $b+5=16+5=21$ years old.

1. If $\boldsymbol{p}$ has the value of 7 , find the value of the following expressions:
a. $3 p$
b. 11-p
C. $2 p+5$
d. $20-2 p$
$\qquad$
2. The formula for working out the perimeter of a parallelogram is $p=2 l+2 h$. Work out the perimeter when:
a. $\boldsymbol{l}=5$ and $\boldsymbol{h}=4$
b. $\boldsymbol{l}=9$ and $\boldsymbol{h}=3$
c. $\boldsymbol{l}=1.5$ and $\boldsymbol{h}=2.5$
3. The cost of producing a box of rulers is worked out as follows:

Cost $=$ number of rulers $\times 11$ pence +15 pence for the box.
4. Crisps cost 25 pence a bag. Write down the formula for the total cost (C) of buying any number of bags. Use your formula to calculate the cost of six bags.
$C=\ldots \ldots \ldots .$. , $£$
5. A plumber charges $£ 30$ an hour plus a $£ 40$ fee for turning up.
a. Write a formula for the total cost of calling a plumber out. Use $T$ to stand for the total cost in pounds and H for each hour worked.

b. Work out the charge for 4 hours' work.

## £

6. If $\boldsymbol{a}$ has the value if 3 and $\boldsymbol{b}$ has the value of 4 , find the following:
a. $3 a+2 b$
b. $3 a-2 b$
c. $5 a-3 b$
d. $a b$
$\qquad$
7. The formula to work out the charges (in pence) a taxi driver makes $\mathrm{T}=80+50 \times \mathrm{M}$ What would the taxi driver charge if a passenger travelled 7 miles?
$\square$

Resource 1: use simple formulae
8. A chicken requires 45 minutes cooking time per kg , plus an extra 30 minutes.
a. Write a formula for the cooking time.
$\qquad$
b. How long would a large 4 kg chicken take to cook? Give your answer in hours and minutes?
$\quad \ldots \ldots \ldots \ldots \ldots$ hours,$\ldots \ldots \ldots . .$. minutes
c. A medium chicken took 2 hours ( 120 minutes) to cook. What was the weight of the chicken in kilograms?
$\square$

## Challenge

1. Two pizza shops advertise the following payments for deliveries.

a. Mrs Jacques wants to order three pizzas. Which shop should she choose?

b. Mr Jones paid $£ 9$ for the delivery of several pizzas for his son’s party from Salty’s shop. How much would it have cost if he had bought the same number of pizzas from Peppa's?
[^1]
## In this task, you will:

## generate and describe linear number sequences.

Look at the examples and answer the questions. If you are anxious, try questions 1 5. If you're feeling confident, try questions 1-7. If you're raring to go, try the challenge too!

## Example 1

Find the missing number in each sequence and write down the rule.
a. $8 \quad 16$..... 32 ...... 48
b. 71 ..... 59 ..... ..... 41

## Answer

a. $16-8=8$. So we 'add 8 ' each time.

81624324048
b. 71-59 = 12 (for two jumps).

So for 1 jump, $12 \div 2=6$.
We 'subtract 6' each time.
$\begin{array}{lllll}71 & 65 & 59 & 53 & 47 \\ 41\end{array}$

## Example 2

Complete the table for the matchstick sequence below.

| Shape | 1 | 2 | 3 | 4 | 10 | 20 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number | 5 | 9 |  |  |  |  |
| Rule |  |  |  |  |  |  |

## Answer

The pattern goes up in 4 s ( +4 each time).
This means that the rule has ' $\times 4$ ' in it.
For the first shape $1 \times 4=4$. To get ' 5 ' we need
to add $1 .$. rule is $\ldots \times 4+1$.
$10^{\text {th }}$ shape $=10 \times 4+1=40+1=41$
$20^{\text {th }}$ shape $=20 \times 4+1=80+1=81$ (not 82 )

1. Write in the missing numbers to complete the following sequences.
a. 1, 4,
10, $\qquad$ , .........,
b. 4, 10, 28, $\qquad$
c. 2, 14, 20, $\qquad$ d. $30, \ldots \ldots$, 22, $\qquad$
2. The rule for a sequence is given by:
 If the first term is calculated by $1 \times 4-3=4-3=1$, complete the next four terms:

$$
1, \ldots . . . . ., \text {..........., .......... , .......... }
$$

Resource 2: generate and describe linear number sequences
3. Write in the missing numbers to complete the following sequences.
a.

| In | Function | Out |
| :---: | :---: | :---: |
| 2 |  |  |
| 5 | $\times 5-2$ |  |
|  |  |  |
|  |  | 38 |

b.

| In | Function | Out |
| :---: | :---: | :---: |
| 4 |  |  |
| 8 | $\div 2+3$ |  |
|  |  | 8 |
|  |  | 18 |

4. Write in the missing numbers to complete the following sequences.

| Position of number | 1 | 2 | 3 | 4 | 20 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Rule | . |  |  |  |  |
| Number sequence | 7 | 10 | 13 | 16 |  |

5. Write in the missing numbers to complete the following sequences.

| Rule | $\times 7$-5 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| In | 4 | 6 | $\ldots$ | 9 | .. |
| Out |  | ........ | 9 | .. | 51 |

6. Write in the missing numbers to complete the following sequences.
a. 7,
25
b. 10 ,
46
c. 3, 27
7. Look at this matchstick sequence.
a. Draw a shape in the pattern (containing 4 'houses').

b. Complete the table:

| Number of houses | 1 | 2 | 3 | 4 |
| :---: | :---: | :---: | :---: | :---: |
| Number of matchsticks | 6 | ....... | ....... | $\ldots$ |
| Rule | ......................................... |  |  |  |

## Challenge

1. Look at this matchstick sequence.
a. Write down the rule for the sequence.

Use $M$ for matchsticks and $N$ for the term number.

b. Louise has 50 matchsticks. Will she be able to use all of these to make a pattern of complete houses in the above pattern or will she have any spare? Explain your reasoning.
$\qquad$

## In this task, you will:

## - express missing number problems algebraically.

Look at the examples and answer the questions. If you are anxious, try questions 1 6. If you're feeling confident, try questions 1-11. If you're raring to go, try the challenge too!

## Example 1

Fill in the missing numbers.
a. $\square$ $+7=12$ b. $2 \times$ $\square$ $-9=7$

## Answer

We can use inverse operations
$+/-$ and $\times / \div$ act as opposites.
a. $12-7=5$
b. $7+9=16$ . so $2 \times$ $\square$ $=16$ then
$\square=16 \div 2=8$

Let $\boldsymbol{x}$ be the unknown.

| $\boldsymbol{x}$ | $\rightarrow$ | $\times 2$ | $\rightarrow$ | -9 | $\rightarrow$ | 7 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\leftarrow$ | $\div 2$ | $\leftarrow$ | + 9 | $\leftarrow$ | 7 |
| 8 |  | 16 |  |  |  |  |

## Example 2

An online shop sells t-shirts for $£ 9$ and charges $£ 4$ for delivery. The shop calculates the total cost using the formula $\mathbf{C}=9 n+4$, where $n$ is the number of $t$-shirts per order.
a. Find the cost of buying eight t -shirts.
b. Fiona paid $£ 112$ for some t-shirts. How many did she buy?

## Answer

a. For $\mathbf{8}$ t-shirts, $\mathrm{C}=9 \times 8+4=72+4=\mathrm{f} 76$
b. For $£ 112$ spent, $9 n+4=112 \ldots$... -4 '...

$$
\begin{aligned}
9 n & =108 \quad \ldots . . \div 9 \prime \\
n & =12
\end{aligned}
$$

Fiona paid $£ 112$ for 12 t-shirts

1. Find the missing numbers:
a.
$11=23$
b. 25 $\qquad$ $=13$
C. $3 \times$ $5=14$
2. Find the value of the letters in the following equations:
a. $p+17=30$
b. $5 \boldsymbol{q}-7=13$
C. $2 r+3=35$
$p=$
$q=$ $\qquad$ $r=$ $\qquad$
3. A taxi driver charges a $£ 3$ pick-up fee and then $£ 2$ per mile. Circle the formula that he uses to calculate the cost of a journey.

$$
3 m+2 \quad 2 m-3 \quad 3 m-2 \quad 2 m+3
$$

4. The letter $f$ is 7 less than the letter $g$.

Write two equations that show the relationship between $f$ and $g$.

5. By solving this multiplication table, find the values of $a, b, c$ and $d$.

| $\times$ | $a$ | $b$ |
| :---: | :---: | :---: |
| 4 | 28 | 36 |
| $c$ | $d$ | 27 |
| $a=\ldots \ldots, b=\ldots \ldots, c=\ldots \ldots, d=\ldots \ldots$. |  |  |

6. Robert thinks of a number. He multiplies it by 7 and subtracts 5 . He ends up with 23 . What number did he start with?
7. Five cauliflowers cost $£ 2$. If three cauliflowers and one broccoli cost $£ 1.50$, find the cost of two broccoli.
$\square$
8. a. If $t=15$, find the value of $3 t-20$.
$\square$
b. Find the value of $d$ when $20-3 d=8$

9. Solve these equations by finding the value of $x$ :
a. $2 x+5=23$
$x=$
b. $7 x-12=30$
$x=$
$\qquad$

Resource 3: express missing number problems algebraically
10. Eric thinks of a number. He doubles it, adds 7 and multiplies that result by 5 . He ends up with 75 . What number did Eric first think of?
11. Joe and Ted think of the same number. Joe adds 15 to the number. Ted multiplies the number by 4 . They both get the same answer. What was the original number?
$\square$

## Challenge

1. Here are two equations:

$$
z=3 y+5 \quad x=30-z
$$

If the value of $\boldsymbol{y}$ is 6 , find the value of $\boldsymbol{x}$.

## In this task, you will:

- find pairs of numbers that satisfy an equation with two unknowns
- enumerate possibilities of combinations of two variables.

Look at the examples and answer the questions. If you are anxious, try questions 1 6. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

## Example 1

Two numbers add up to 28. Both numbers are less than 20. What could they be?

Answer
$x+y=28$
Start with $19+9=28$
$18+10=28$
$17+11=28$
$16+12=28$
$15+13=28$
$14+14=28$..
then repeats ...

Example 2
Example 3
Find two solutions to $\mathbf{6 c}-\mathbf{5 d}=$ 19

## Answer

Build tables for $6 c$ and $5 d$ :
6c: 6, 12, 18, 24, 30, 36, 42, 48,...
5d: 5, 10, 15, 20, 25, 30, 35, 40,...
The first one is $24-5=19$ where $c=4, d=1$.
The second one is 54-35=19 where $\boldsymbol{c}=\mathbf{9}, \boldsymbol{d}=\mathbf{7}$.
b. $5 m-3 \times 7=14$

$$
\begin{aligned}
5 m-21 & =14(14+21) \\
5 m & =35(35 \div 5) \\
m & =7
\end{aligned}
$$

If $5 m-3 n=14$, find
a. the value of $n$ when $m=$ 4
b. the value of $m$ when $n=$ 7

Answer
a. $5 \times 4-3 n=14$ $20-3 n=14(20-14)$
$3 n=6(6 \div 3)$
$n=2$

1. Two numbers add to give 12 . Write down all the possible numbers.
2. Find all the possible solutions to the following equations:
a. $x+y=10$

b. $\boldsymbol{x}-\boldsymbol{y}=5$ (both numbers positive and less than 10 )
3. Fill in the gaps for each of these equations:
a. $x+y=12$
b. $4 x+y=20$
i. $x=5, y=$ $\qquad$ i. i. $x=3, y=$ $\qquad$
ii. ii $x=$ $\qquad$ $y=9$
ii. $x=$ $\qquad$ $y=12$
4. In the equation, $4 \boldsymbol{p}=\boldsymbol{q}$, both $\boldsymbol{p}$ and $\boldsymbol{q}$ are whole numbers less than 30 . Write down all the possible solutions for the equation.

Build up the 4 times table:

| $\mathbf{q}$ | 1 | 2 |  |  |  |  |  |
| :---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\mathbf{p}$ | 4 | 8 |  |  |  |  |  |

5. If $3 g-2 h=7$, find the value of:
a. $g$ when $h=4$ $\square$ b. $\boldsymbol{h}$ when $\boldsymbol{g}=7$
$h=$ $\qquad$
6. Write down 2 possible solutions to the following:
a. $4 \boldsymbol{x}+3 \boldsymbol{y}=30$
b. $4 x-3 y=12$
$\qquad$
$\qquad$
$\qquad$
7. Write down four possible pairs of numbers for the equation $3 \boldsymbol{s}-5=\boldsymbol{t}$.

| $s=\ldots . . . . . . . . . . . .$. , $t=\ldots . . . . . . . . . . . . .$. |  |
| :---: | :---: |
| $s=\ldots \ldots \ldots \ldots \ldots .$. | $S=\ldots . \ldots . \ldots \ldots . .$. |

8. In the equation, $3 \boldsymbol{e}-2 f=4$, both numbers $e$ and $f$ are less than 12 . Find all the possible pairs of $e$ and $f$ that satisfy this equation:

## Challenge

1. Find one solution that is true for the pairs of equations.
a. $\boldsymbol{r}+\boldsymbol{s}=16$,
$r-s=6$
b. $\boldsymbol{v}+\boldsymbol{w}=7$,
$3 v+2 w=16$
$\qquad$
$\qquad$
$r=$

$s=$
$\qquad$

## Section 4:

## Measurement

## In this task, you will:

- solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate
- use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit to a larger unit, and vice versa, using decimals up to three decimal places.

Look at the examples and answer the questions. If you are anxious, try questions 18. If you're feeling confident, try questions 1-11. If you're raring to go, try the challenge too!

One tin of baked beans weighs 425 g . Tins are sold in packs of 4 . How much do 3 packs weigh? Give your answer in kg.

## Answer

3 packs of $4=12$ tins of beans. So 12 tins weigh $12 \times 425 \mathrm{~g}$.
Now $12 \times 425 \mathrm{~g}=5100 \mathrm{~g}$.
Since $1 \mathrm{~kg}=1000 \mathrm{~g}$, then $5100 \mathrm{~g}=5100 \div 1000 \mathrm{~kg}$ $=5.1 \mathrm{~kg}$

|  | 4 | 2 | 5 |
| :---: | :---: | :---: | :---: |
| $\times$ |  | 1 | 2 |
|  | 8 | $5_{1}$ | 0 |
| 4 | 2 | 5 | 0 |
| $5_{1}$ | $1_{1}$ | 0 | 0 |

1. Convert the following metric units:

2. Isa walks 273 m to school five days a week. She returns home the same way. How far does she walk altogether in one week of school? Give your answer in kilometres.
$\square$
3. Julie fills cups with juice for a party. Each cup can hold 295 ml of juice. If she fills 20 cups, how much juice does she need in litres?
$\square$
4. A small parcel weighs 145 grams. How much do nine parcels weigh in kilograms?

5. If I swim 200 metres each day. How many days will it take me to swim the equivalent of 3 kilometres?

6. How many weeks and days is 53 days equal to?
7. A film at the cinema lasts for 1 hour and 40 minutes. If the film starts at a quarter to two in the afternoon, at what time did it finish?
$\square$
8. A pencil weighs 11 g . A box for 12 pencils weighs 15 g . Calculate the weight of 10 boxes of 12 pencils. Give your answer in kilograms.
$\square$
9. Mandy has a 1 litre carton of orange juice. She fills five glasses with it.

She puts 160 ml of juice in each glass.
How much juice does she have left?
10. Paula walks 4.62 km during a week, Kate walks $43 / 4 \mathrm{~km}$ and Alex walks 4560 m . a. Who walks the furthest?

b. How far do they walk in total?
$\square$
11. There are 24 screws in a small pack. Each screw weighs 7 g .
a. How much do 30 packs weigh in kilograms?

b. How many packs would Tim need to buy if he wanted $\frac{1}{2} \mathrm{~kg}$ of screws?

## Challenge

1. A shop sells cartons of juice using the following offers:

Thelma wants to buy 9 litres of juice for a party. Which offer should she use to buy her juice?

## Offer

2. Seven identical books are placed on a shelf which is half a metre long. If each book is 6.4 cm in width, what is the gap left on the end? Give your answer in millimetres.

6.4 cm
$\square$

## In this task, you will:

- convert between miles and kilometres.

Look at the examples and answer the questions. If you are anxious, try questions 14. If you're feeling confident, try questions 1-7. If you're raring to go, try the challenge too!

## Example

5 miles $=8$ kilometres
a. Convert 13 miles into kilometres.
b. Convert 100 km into miles.

## Answers

a. 5 miles $=8 \mathrm{~km}(\div 5)$

1 mile $=1.6 \mathrm{~km}(\times 8)$
13 miles $=12.8 \mathrm{~km}$

|  |  | 1 | $\bullet$ |
| :---: | :---: | :---: | :---: |
| $\times$ |  |  | 8 |
|  | 1 | $2{ }_{4}$ | 8 |

b. $8 \mathrm{~km}=5$ miles ( $\div 8$ )
$1 \mathrm{~km}=0.625$ miles $(\times 100)$ $100 \mathrm{~km}=62.5$ miles

|  |  |  |  | 0 |
| :--- | :---: | :---: | :---: | :---: |

1. Convert the following distances into kilometres:
a. 10 miles
b. 25 miles
c. 3 miles
2. Convert the following distances into miles:
a. 24 km
b. 56 km
c. 10 km
3. Complete the following table:

| Distance in miles | Distance in km |
| :---: | :---: |
| 15 miles | 32 km |
|  | 200 km |
|  |  |
| 18 miles |  |
| 100 miles | 3.6 km |
|  |  |

4. Complete the following:
a. 1 mile = $\qquad$ km
b. 9 miles $=$ $\qquad$ km
c. 27 miles $=$ $\qquad$ km
d. $8 \mathrm{~km}=$ $\qquad$ miles
e. $20 \mathrm{~km}=$ $\qquad$ miles
f. $52 \mathrm{~km}=$ $\qquad$ miles
5. In the UK, the maximum speed limit on motorways is 70 mph . In Spain, the maximum speed limit is $130 \mathrm{~km} / \mathrm{h}$. Which country has the higher speed limit?
$\square$
6. David ran 4.5 miles. Jenny ran 7 km . Who ran further and by how much?
$\square$
7. Michael wants to complete 100 miles over three days. On day one, he cycles 50 km . On day two, he cycles 10 miles less than he did on day one. How far does he have to cycle on the third day?

## Challenge

1. Two runners look at how fast they can run. Alisa can run at 7 miles per hour. Jasmine can run at 3 metres per second. Who runs faster?

You may need to know: 1 hour = 3600 seconds.
$\square$
2. Mr Rushton wants to compare the hire costs of two cars in two different countries. He needs to travel 360 miles. Which country represents the better value?

The table shows you the individual costs. You will need to know: 1 gallon = 4.5 litres

England
40 miles to the gallon
$£ 1.20$ per litre of petrol

Germany
16 kilometres to the litre £6 per gallon of petrol
$\square$

Resource 3: area and perimeter

## In this task, you will:

- recognise that shapes with the same areas can have different perimeters and vice versa.

Look at the examples and answer the questions. If you are anxious, try questions 14. If you're feeling confident, try questions 1-6. If you're raring to go, try the challenge too!

## Example

Remember: Area $=$ length x width or $\mathrm{a}=1 \times \mathrm{w}$
Perimeter $=2 x$ length and $2 x$ width or $P=2 l+2 w$

The grid below contains four shapes.

|  | A |  |  |  | B |  |  |  |  | C |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | D |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

a. Which shapes have the same perimeter? $\qquad$
b. Which shape has a different area to the others?
c. Draw a triangle with the same area as rectangle C.

Answers

|  | A |  | B |  |
| :---: | :---: | :---: | :---: | :---: |
|  | C | D |  |  |
| Perimeter | 10 cm | 12 cm | 14 cm | 12 cm |
| Area | $6 \mathrm{~cm}^{2}$ | $6 \mathrm{~cm}^{2}$ | $6 \mathrm{~cm}^{2}$ | $5 \mathrm{~cm}^{2}$ |

a. Shapes B and D have the same perimeter of 12 cm .

Shape $D$ has a different area of $5 \mathrm{~cm}^{2}$.
b. For a triangle with an area of $6 \mathrm{~cm}^{2}$, we have to think of cutting a rectangle with an area of $12 \mathrm{~cm}^{2}$ in half. This could be: $12 \times 1$; or $6 \times 2$ and $4 \times 3$ as shown by the shaded diagrams above.

1. Write down the area and perimeter of the following rectangles.
a.

b.
c.
5 cm

| ....................... | $\ldots \ldots . . . . . . . . . . . . . . . .$. |  |
| :---: | :---: | :---: |

2. Look at the shapes in the grid below.

|  | $\mathbf{P}$ |  |  |  |  | S |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| R |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

a. Which two shapes have the same perimeter?
b. Draw a shape with a perimeter of 6 cm , Find the area.
c. Draw a shape with an area of $6 \mathrm{~cm}^{2}$. Find the perimeter. $\qquad$
3. Use the formula to find:
a. The perimeter of the following rectangle:

b. Find the length if the perimeter $=40 \mathrm{~m}$

4. Use the grid opposite to draw:

Two shapes with a perimeter of 10 cm , but with different areas.

5. Use the grid opposite to draw:

Two shapes where the perimeter is twice its area.

6. The following shapes are made by using rectangles measuring

6 cm

a. Work out the perimeter of the following shape:

b. Work out the perimeter of the following shape:

$\square$

## Challenge

1. Draw at least three shapes that have the same area and perimeter as shape $P$.
2. Draw two shapes which have a smaller area than $P$ but have a larger perimeter.

| P | P |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

## In this task, you will:

- recognise when it is possible to use formulae for area and volume of shapes
- calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres $\left(\mathrm{cm}^{3}\right)$ and cubic metres $\left(\mathrm{m}^{3}\right)$, and extending to other units.

Look at the examples and answer the questions. If you are anxious, try questions 14. If you're feeling confident, try questions 1-6. If you're raring to go, try the challenge too!

$$
\begin{aligned}
& \text { Example Use the following formulae to find the volume } \\
& \text { and area of shapes } \\
& \begin{array}{c}
\mathbf{A}=\mathrm{I} \times \mathbf{w} \\
\mathbf{P}=\mathrm{I} \times \mathbf{w} \times \mathrm{h}
\end{array}
\end{aligned}
$$

A tank in the shape of a cuboid measures 30 cm by 30 cm by 9 cm .
A leaky valve lets water out at a rate of $27 \mathrm{~cm}^{3}$ every minute.
How long will it take to empty if the tank was half full?

## Answer

Volume of water in tank $=1 \times w \times h$

$$
\begin{aligned}
& =30 \times 30 \times 9 \\
& =8100 \mathrm{~cm}^{3}
\end{aligned}
$$

Time taken $=8100 \div 27=300$ minutes
= 5 hours

1. Find the volume of the following cuboids:
a.

b.

10 cm
c.

5 m

2. The volume of this cuboid is $24 \mathrm{~cm}^{3}$. Calculate its height.

3. Find three different ways to make a cuboid with a volume of $30 \mathrm{~cm}^{3}$.
$\qquad$
$\qquad$
$\qquad$
4. A cuboid has a volume of $60 \mathrm{~m}^{3}$.

If the length of the cuboid is 5 metres, what could its width and height be?

5. One face of a cube has an area of $16 \mathrm{~cm}^{2}$.

What is the volume of the cube?

6. Find the volume of this shape. All dimensions are in centimetres.

## Challenge

1. Calculate the volume of the following two boxes:
Box A

Box B

Box $B$ volume $\qquad$
b. The two boxes are filled with water. Which box will hold the most water?

## In this task, you will:

## - calculate the area of parallelograms and triangles.

Look at the examples and answer the questions. If you are anxious, try questions 16. If you're feeling confident, try questions 1-9. If you're raring to go, try the challenge too!

## Example 1

Look at this triangle.
Work out its area by:
a. Counting squares
b. Using the formula.

## Answer

a. Numbering the squares including halves, the area is 9 square units
b. Area $=$ base $\times$ height $\div 2$

$$
=6 \times 3 \div 2=18 \div 2=9 \mathrm{~cm}^{2}
$$

## Example 2

Calculate the area of this parallelogram.

## Answer

Remember SNOTS - Say No To Slants
Area $=$ base $\times$ height $=5 \times 3$

$$
=15 \mathrm{~m}^{2}
$$

SNOTS works for all shapes with any sloping sides, remember to ignore them!

1. Find the areas of these triangles.
a.

5 cm
b.

c.

| $\ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots . . \mid$ |
| :---: |
| $\ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots$ |
| $\ldots \ldots \ldots \ldots \ldots \ldots \ldots . \mathrm{cm}^{3}$ |

$\square$
2. Which triangle is bigger?

$\mathrm{cm}^{2}$
$\mathrm{cm}^{2}$

Triangle $\qquad$ is bigger.

Resource 5: calculate the area of parallelograms and triangles
3. Find the areas of these triangles.
a.

b.

c.

200 m
4. Which parallelogram is the smaller?

$\mathrm{cm}^{2}$

...................... cm ${ }^{2}$
Parallelogram .... is smaller.
5. On the grid below draw the following shapes with an area of 4 square units:
a. Triangle
b. Parallelogram

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

6. Draw two different triangles which have same area as the rectangle below:

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\|c\| c \mid$ |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

Resource 5: calculate the area of parallelograms and triangles
7. On the grid below, draw a parallelogram with an area of $16 \mathrm{~cm}^{2}$.

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

8. Find the area of the following shape.

9. Work out the shaded area.

## Challenge

1. A larger square has a smaller (shaded) square drawn inside it, as in the diagram.
a. Calculate the area of the larger square.

## Section 5:

## Geometry

Look at the examples and answer the questions. If you are anxious, try questions 16. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

## Example 1

## Example 2

 angles are $65^{\circ}$.

## Answer

Opposite angles are equal and all four angles add up to $360^{\circ}$.
So far, $65^{\circ}+65^{\circ}=130^{\circ}$.
$360^{\circ}-130^{\circ}=230^{\circ}$
Obtuse angle $=230^{\circ} \div 2=115^{\circ}$

Take this rectangle. Draw two straight lines to make a rhombus.

## Answer

Remember all the sides are equal. The bold lines represent diagonals that cut at right angles.

1. One angle in a parallelogram is $72^{\circ}$. Find the size of the other angle.
$\square$
2. One angle in an isosceles triangle is $50^{\circ}$. Find the size of the other angles.
$\square$

Resource 1 - draw, compare and classify 2D shapes
3. Here are five triangles. Write down the letter of each triangle that has a right angle.
a.
b.
C.

d.

e.

4. Draw three different hexagons that contain at least one right angle.

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

5. Using a ruler and a protractor or set square, draw a $8 \mathrm{~cm} \times 3 \mathrm{~cm}$ rectangle.
$\square$
6. Here is a sketch of a triangle. It is not drawn to scale. Using a pencil, ruler and a protractor, draw an accurate drawing of the triangle below.

$\square$
7. A kite has a perimeter of 20 cm . If one of the sides measures 4 cm , find the lengths of the other sides.
Draw an accurate diagram of your kite below.

## Challenge

1. Draw to the exact size a rhombus with side lengths of 6 cm and one of the angles equal to $60^{\circ}$. Use a pencil, ruler and protractor.

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

Resource 2 - recognise, describe and build simple 3D shapes

## In this task, you will:

- recognise, describe and build 3D shapes, including making nets.

Look at the examples and answer the questions. If you are anxious, try questions 1-
5. If you're feeling confident, try questions 1-7. If you're raring to go, try the challenge too!

## Example 1

Look at this squarebased pyramid.
Complete the table.

## Answer

Vertices (vertex is single) are the corners. Edges are the drawn lines. Faces are the surfaces.

| Faces | Edges | Vertices |
| :---: | :---: | :---: |
| 5 | 8 | 5 |

## Example 2

Fill in the spaces in the net of the cube below according to the following rules:

1 is opposite 4
2 is opposite 5
3 is opposite 6

## Answer

Opposite faces don't touch each other (on an edge).

1. Link the shape to its correct name.

Sphere

Triangular prism

Cuboid

Tetrahedron
2. Name a shape with six faces. There may be more than one.
$\square$

Resource 2 - recognise, describe and build simple 3D shapes
3. Write the names of theses shapes in the correct places below.

| Cuboid | Triangular prism | Cylinder |
| :---: | :---: | :---: |
| Hexagonal prism | Cone | Sphere |
| Cube | Square-based pyramid | Tetrahedron |

At least one square face
No square faces

|  | At least one square face | No square faces |
| ---: | :---: | :---: |
| Curved |  |  |
| face |  |  |
| No curved |  |  |
| face |  |  |

4. Draw a ring around the correct net of the cube shown.

5. Complete the table below.

Number of faces Number of vertices Number of edges

| Cuboid |  |  |  |
| ---: | :--- | :--- | :--- |
| Cylinder |  |  |  |
|  |  |  |  |
| Tetrahedron |  |  |  |
| (exism |  |  |  |
| Cube |  |  |  |

6. Name the shapes.

Shape properties
Name of shape

| 6 rectangular faces, 12 edges and 8 vertices |  |
| :--- | :--- |
| 1 curved face, 1 flat face, 1 vertex and 1 edge |  |
| 7 flat faces, 15 edges and 10 vertices |  |
| 1 curved face, no edges and no vertices |  |

Resource 2 - recognise, describe and build simple 3D shapes
7. On the grid below draw the shape the net below makes.

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  | - |  | - |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  | - |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Challenge

1. a. Circle the net which does not fold to make a cuboid.

b. Draw at least two more nets to make a cuboid.

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

2. A truncated cube is made by cutting off each of the eight corners. The first one has been done for you. Visualise the shape and complete the table below.

| Triangular <br> faces | Octagonal <br> faces | Edges | Vertices |
| :---: | :---: | :---: | :---: |
|  |  |  |  |
|  |  |  |  |

## In this task, you will:

- recognise, describe and build 3D shapes, including making nets.

Look at the examples and answer the questions. If you are anxious, try questions 15. If you're feeling confident, try questions 1-6. If you're raring to go, try the challenge too!

## Example

Here are the parts of circle.

1. The radius of a circle is 12 cm . What is its diameter?
$\square$
2. The diameter of a circle is 7 m . What is its radius?
$\square$
3. Label the parts of the circle.

4. Jenny measures the radius of her dinner plate as 9 cm .
a. What is the diameter of her dinner plate?

b. The diameter of her teacup is 10 cm . What is its radius?
$\square$
c. Jenny decorates some Easter eggs by tying ribbon around the circumference of each egg. She knows that the circumference of each egg is 36 cm .
How much ribbon will she need to decorate five eggs?

5. Dale measures the radius of a 10 p coin as 12 millimetres. He lines up as many as he can until he reaches 1 metre.
a. How many 10p coins will he have altogether?

b. What is the total value of this?
$\square$
6. Danni stacks 2 p coins to make a tower.

She finds that a stack of 14 coins is the same height as that of a single two pence coin standing on its end. If the radius of the coin is 14 mm , what is the thickness of one 2 p coin?

## Challenge

1. Three large circles and five small circles fit exactly inside this rectangle.

The radius of the small circle is 6 centimetres. Find the diameter of the larger circle.

2. Nine circles are enclosed in a square, as shown in the diagram below. If the radius of one of the circles is 2 cm long, what is the area of the square?

## In this task, you will:

- recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.

Look at the examples and answer the questions. If you are anxious, try questions 15. If you're feeling confident, try questions 1-8. If you're raring to go, try the challenge too!

## Example 1

Find the size of angle m .

Answer
Angles on a straight line $=180^{\circ}$.
So far, $180^{\circ}-48^{\circ}=132^{\circ}$.
So, $m^{0}=132^{\circ} \div 2=66^{\circ}$

## Example 2

Find the size of angle $\mathbf{n}$.

## Answer

Angles in a circle (full turn) $=360^{\circ}$
So far $90^{\circ}+152^{0}=242^{\circ}$
$n^{0}=360^{\circ}-242^{0}$

$n^{0}=118^{0}$

1. Find the missing angle in each of the following diagrams.

$a^{0}=$ $\qquad$ $0 \quad b^{0}=$ $\qquad$ $0 \quad \mathbf{c}^{0}=$ $\qquad$ 0
2. Meza says she can draw three angles together and make a perfect straight line. She uses the angles $49^{\circ}, 74^{\circ}$ and $67^{\circ}$. Is she correct? Show your working out.

3. Find the missing angle in the following diagrams:

$a^{0}=$ $\qquad$ $0 \quad b^{0}=$ $\qquad$ $0 \quad \mathbf{c}^{0}=$ $\qquad$ 0
4. Calculate the size of angle w.

5. $A B$ and $C D$ are straight lines. Find the size of angle $x$.
$\square$

6. Three angles meet at a point. One angle is twice the size of the other and the third angle is $60^{\circ}$. Find the size of the two missing angles.

7. Find the size of the angles outside the triangle.

$h^{0}=$ $\qquad$ 0
$i^{0}=$ $\qquad$ $0 \quad j^{0}=$ $\qquad$
8. Find the size of the unknown angles inside this rectangle.

## Challenge

1. The shape below has three identical white tiles and three identical grey tiles. The sides of each tile are all the same length. Opposite sides of each tile are parallel. One of the angles is $82^{\circ}$.
a. Calculate the size of angle $\mathbf{a}^{0}$.

b. Calculate the size of angle $\mathbf{b}^{0}$.

Resource 1- draw, translate and reflect simple shapes in four quadrants

## In this task, you will:

- describe positions on the full coordinate grid (all four quadrants)
- draw and translate simple shapes on the coordinate plane, and reflect them in the axes.

Look at the examples and answer the questions. If you are anxious, try questions 1. If you're feeling confident, try questions 1 and 2 . If you're raring to go, try the challenge too!

## Example

1. Write down the coordinates of point $A$. Coordinates of $A=(-4,-1)$.
2. Draw the point $D$ with coordinates $(5,-2)$. See diagram below.
3. Translate the triangle $A B C 3$ to the right and 1 up. Label this T. See diagram below.
4. Reflect triangle $A B C$ in the $x$-axis. Label this R. See diagram below.
5. What are the coordinates of the point that would reflect in the $y$-axis to give (2,-5)? Coordinates $=(-2,-5)$

|  |  |  |  |  | $y$ |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
| A |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

Resource 1- draw, translate and reflect simple shapes in four quadrants

1. Use the grid opposite.
a. Write down the coordinates of $\mathbf{A}$. Answer: A = (....... , ..........)
b. Plot the point $\mathbf{D}(-1,5)$.
c. Translate the triangle $A B C 2$ units to the left and 5 up. Label it T.
d. Reflect triangle $A B C$ in the $y$-axis. Label it.

y

| P |  |  | Q |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

2. Use the grid opposite.
a. Write down the coordinates of $P=($ )
b. Plot the point V $(0,-6)$.
c. Translate the quadrilateral PQRS 5 units to the right. Label it A.
d. Reflect PQRS in the x-axis. Label it B.

## Challenge

1. Use the grid opposite.

Write the new coordinates when:
a. $(2,5)$ is translated 3 units to the left. ( $\qquad$
b. $(0,-2)$ is translated 2 units up.

$$
(\ldots . . . ., \text {...... })
$$

c. $(-4,1)$ reflected:
i. in the $x$-axis (......., ,.......)
ii. in the $y$-axis $(\ldots \ldots ., \ldots \ldots$.

## Section 5:

## Statistics

Resource 1: interpret and construct pie charts and line graphs

## In this task, you will:

> - recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.

Look at the examples and answer the questions. If you are anxious, try questions 1-
4. If you're feeling confident, try questions 1-6. If you're raring to go, try the challenges too!

## Example 1

The table shows the number of goals scored by a hockey team over a series of 24 games. Draw a pie chart to show these results.

| Goals scored | 0 | 1 | 2 | 3 | 4 or more |
| ---: | :---: | :---: | :---: | :---: | :---: |
| Total | 2 | 8 | 6 | 4 | 4 |

## Answer

$2+8+6+4+4=24$ games
If 12 slices $=24$ games
then 1 slice $=24 \div 12$
= 2 games

## Example 2

The line graphs show the average scores two teams, the Misfits and the Go-Getters, scored each week for the last eight weeks.

The teams' scores

a. In which week did the two teams have the biggest difference in scores?
b. In which weeks were their combined scores the largest?

## Answer

a. Week 4 (difference $=10-5=5$ ).
b. Weeks 5 and 6 have the biggest total of $17(9+8$ and $10+7)$.

1. The table below shows the votes for three competitors in a competition.
Complete the pie chart to illustrate the information.

| A | B | C |
| :---: | :---: | :---: |
| 3 | 9 | 6 |

2. The following pie charts show favourite colours. Match each statement to the correct pie chart.

$$
\begin{aligned}
& \text { If four people } \\
& \text { chose red then } \\
& \text { eight people } \\
& \text { chose blue. }
\end{aligned}
$$

One quarter of the people chose red.

The same number of people chose red and green.

About 20\% of the people chose white.
3. The graph shows an outing taken by Joe last Saturday.
Read the graph carefully and fill in the blanks.
a. Joe first stopped at am.
b. He travelled $\qquad$
kilometres in the first hour.
c. By 9am, he had travelled
............kilometres.
d. He shopped for hours.
e. His journey home took $\qquad$ hours.
f. His whole outing took hours.

Resource 1: interpret and construct pie charts and line graphs
4. The graph shows the temperature recorded each hour during an afternoon.

a. What was the highest temperature?................................................. ${ }^{\circ} \mathrm{C}$
b. How many hours had a temperature below $14^{\circ} \mathrm{C}$ ? hours
c. At what time was the temperature double that at 1 pm ? $\qquad$
d. Between which two times did the temperature drop the fastest?
5. The line graph shows the sales of ice-

200 creams and cups of tea at a small cafe.
a. How many ice-creams were sold in March?
$\qquad$
b. How many more ice-creams than cups of tea were sold in June?
c. How many cups of tea would you expect to sell in July?

Jan Feb Mar Apr May Jun Ice-cream $\simeq$ Tea

6. Complete the following pie chart.

Forty pupils were asked what their favourite type of crisps were.
Complete the pie chart to illustrate the information.

| Flavour | Frequency | Angle |
| :---: | :---: | :---: |
| Beef | 14 |  |
| Chicken | 10 |  |
| Cheese and onion | 5 |  |
| Plain | 11 |  |
| Total | 40 |  |

## Challenge

1. The pie charts show the results of a reading test.
a. Eight girls fail the test.

How many girls pass the test?
girls.
b. The same number of boys took the test. How many boys failed the test? boys.
2. The graph shows how much water is drunk during two days.
On which day was most water drunk?

Girls

Fail = $\square$

Boys

Pass=

## Daily water drinks

Which day do you think was warmer and why?

## In this task, you will:

## e-calculate and interpret the mean as an average.

Look at the examples and answer the questions. If you are anxious, try questions 1 6. If you're feeling confident, try questions 1-10. If you're raring to go, try the challenge too!

## Example 1

The mean of three numbers is 4 . If one of the numbers is 5 , what could the other two numbers be?

Answer
The total of the three numbers $=3 \times$ $4=12$
Now 12-5 = 7. So the other two numbers must add up to 7 .
These could be: 6 and 1, 5 and 2, 4 and 3.

## Example 2

A gymnast has averaged 5.3 in her first four events. What score does she need to achieve in her next event to increase her mean to 5.4?

## Answer

Total of the first four scores $=4 \times 5.3=21.2$
For a mean of 5.4 , her total $=5 \times 5.4=27.0$
Her fifth score must be: $27.0-21.2=5.8$

1. Find the mean of the following sets of numbers:
a. $4,6,3,7$
b. $3,8,8,4,7$
C. $1,0,9,6,4,10$
2. The midday temperatures were recorded in the table for the last six months of 2018.

Find the mean temperature.

| July | August | September | October | November | December |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $18^{\circ} \mathrm{C}$ | $20^{\circ} \mathrm{C}$ | $17^{\circ} \mathrm{C}$ | $15^{\circ} \mathrm{C}$ | $14^{\circ} \mathrm{C}$ | $12^{\circ} \mathrm{C}$ |

The mean is $\qquad$ .
3. The mean of two numbers is 8 . If one of the numbers is 5 , what is the other number?
4. The mean of two numbers is 3 . What could the two numbers be?: Give three possible pairs of answers.

| ............., . .............. | .............., ............... | ............ , .............. |
| :---: | :---: | :---: |

5. Four friends are collecting shells on a beach. Find the mean number of shells collected.

6. The mean of three numbers is 7 . If two of the numbers are both 4 , what is the third number?
$\qquad$
7. During a game of basketball, Mike scored 14, 9 and 11 points in the first three quarters. How many points does he need to score in the fourth quarter in order to score a mean of 12 points per quarter for the whole game?
$\square$
8. Find the missing number $4, ?, 7,3$, when the mean is 6 .
9. The mean of five numbers is 11 . The mean of two of the numbers is 14 . What is the mean of the three numbers?
$\square$
10. The mean of seven numbers is 3 . The mean of another five numbers is 15 . What is the mean of all twelve numbers put together?

## Challenge

1. The line graph shows the ages of toddlers who attended a photo shoot.

Calculate their mean age in years.

## Teacher's section

# for year 6 

 Maths
teachit primary

## Teaching notes and curriculum mapping

This resource aims to provide year 6 teachers with a photocopiable, independent home learning task for maths for every week of the school year.

The resource is divided into two sections - a teacher's section (including teaching notes, curriculum mapping, detailed answers and a tick list to enable teachers to track which tasks they have set and when) and a pupil's section which contains units for number, ratio and proportion, algebra, measurement, geometry and statistics.

Each unit comprises a set of photocopiable tasks. Each task is mapped to one or more of the requirements of the National Curriculum for maths year 6 and is intended to consolidate the learning that has been done in class.

Tasks are introduced through a comprehensive example and are differentiated. For each tasks, there is a suggestion for those who may find the topic difficult, a suggestion for those who are confident and a challenge for those who are raring to go!

We hope you enjoy using this resource. If you have any questions, please get in touch: email support@teachitprimary.co.uk or call us on 01225788851 . Alternatively, you might like to give some feedback for other Teachit Primary members - you can do this by adding a comment on the Home learning for year 6-Maths page on Teachit Primary (please log in to access this!).

## Teacher's tick list

Keep track of what you have set and when.

| Number: number and place value | Date set |
| :---: | :---: |
| Resource 1 - read, write, order and compare numbers up to 10,000,000 |  |
| Resource 2 - use negative numbers in context |  |
| Resource 3 -solve number and practical problems |  |
| Number: all four operations | Date set |
| Resource 1 - multiply multi-digit numbers up to 4 digits |  |
| Resource 2 - formal long division |  |
| Resource 3-formal short division |  |
| Resource 4 -perform mental calculations |  |
| Resource 5 - identify common factors, multiples and prime numbers |  |
| Resource 6 - BODMAS |  |
| Resource 7 - addition and subtraction multi-step problems |  |
| Resource 8 -addition, subtraction, multiplication and division problems |  |
| Resource 9 - use estimation to check answers |  |
| Number: fractions (including decimals and percentages) | Date set |
| Resource 1 - use common factors to simplify fractions |  |
| Resource 2 - add and subtract fractions |  |
| Resource 3 - multiply proper fractions |  |
| Resource 4 - divide fractions by whole numbers |  |
| Resource 5 - multiply numbers up to two decimal places |  |
| Resource 6 - written division methods up to two decimal places |  |
| Resource 7 -use equivalences between fractions, decimals and percentages |  |
| Ratio and proportion | Date set |
| Resource 1 - relative sizes |  |
| Resource 2-calculations of percentages |  |
| Resource 3 - scale factors |  |
| Resource 4 - unequal sharing |  |

| Algebra |
| :---: |
| Resource 1 - use simple formulae |
| Resource 2-generate and describe linear number sequences |
| Resource 3 - express missing number problems algebraically |
| Resource 4 - working with two variables |

## Measurement

Resource 1 -solve problems involving units of measure
Resource 2 - convert between miles and kilometres
Resource 3 - area and perimeter
Resource 4-use formula for area and volume of shapes
Resource 5 - calculate the area of parallelograms and triangles

## Geometry: properties of shape

Resource 1 -draw, compare and classify 2D shapes
Resource 2 - recognise, describe and build simple 3D shapes

Resource 3 - illustrate and name parts of the circle
Resource 4 - recognise angles

Geometry: position and direction
Resource 1 - draw, translate and reflect shapes in all four quadrants

## Statistics

Resource 1 - interpret and construct pie charts and line graphs
Resource 2 - using the mean

Date set
$\qquad$

## Date set

Date set

Date set
$\square$

## Number: number and place value answers

Resource 1 - read, write, order and compare numbers up to $10,000,000$

|  | Working out |  |  | Answer |
| :---: | :---: | :---: | :---: | :---: |
| 1. | 1523 |  | $\longrightarrow$ | One thousand five hundred and twenty-three |
| 2. | 8071 |  | $\longrightarrow$ | Eight thousand and seventy-one |
| 3. | 17,080 |  | $\longrightarrow$ | Seventeen thousand and eighty |
| 4. | 8,230,05 |  | $\longrightarrow$ | Eight million, two hundred and thirty thousand, and fifty |
| 5. | Six thous and two | seven hundred | $\longrightarrow$ | 6702 |
| 6. | Twelve hundred | nd, five ghty | $\longrightarrow$ | 12,580 |
| 7. | Half of a | n | $\longrightarrow$ | 500,000 |
| 8. | Ten milli and one | ty thousand ed | $\longrightarrow$ | 10,050,100 |
| 9. | 1943 |  | $\longrightarrow$ | Nine hundreds or 900 |
| 10. | 90,500 |  | $\longrightarrow$ | Nine ten thousands or 90,000 |
| 11. | 9,154,000 |  | $\longrightarrow$ | Nine millions or 9,000,000 |
| 12. | $94 \times 10=$ |  | $\longrightarrow$ | Nine hundreds or 900 |
| 13. | 8473 | 8500 (nearest |  | 8000 (nearest 1000) |
| 14. | 19,637 | 20,000 (neare | 1000) | 19,640 (nearest 10) |
| 15. | 203,848 | 203,850 (near | 10) | 203,800 (nearest 100) |

Challenge

| Workings out and answers |  |
| :--- | :--- |
| 1. | 98,653 (ninety-eight thousand, six hundred and fifty-three) |
| 2. | $365 ; 368 ; 369$ |
| 3. | For example: $59,863,58,693,56,938$ |
| 4. | $5368 ; 5369 ; 5386 ; 5389 ; 5396 ; 5398$ |
| 5. | Any five-digit number that starts with $96,000,95,000$ or $98,000$. |
| 6. | $85,86,89$ and 93 |
| 7. | $953 ; 963 ; 983$ |

Resource 2 - use negative numbers in context

> Workings out and answers

| 1. | a. $8^{\circ} \mathrm{C}$ | b. $2^{\circ} \mathrm{C}$ |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 2 | a. $16^{\circ} \mathrm{C}$ | b. $5^{0} \mathrm{C}$ |  |  |
| 3 | a. $5^{\circ} \mathrm{C}$ | b. $-2^{\circ} \mathrm{C}$ |  |  |
| 4. | a. $-3+4=1$ | b. $-3-2=-5$ | C. $-3+20=17$ | d. $-3-20=-23$ |
| 5 | $-7+15=8$ |  |  | $8^{0} \mathrm{C}$ |
| 6 | $8-15=-7$ |  |  | $-7^{\circ} \mathrm{C}$ |

Number: answers

| 7 | $9+17=8$ | $8^{\circ} \mathrm{C}$ |
| :---: | :---: | :---: |
| 8 |  | C. $11-\mathrm{-8}=19^{\circ} \mathrm{C}$ |
| 9 a | Sequence ascends in 3 s . So, counting back in 3 s $7-3=4 \ldots 1-3=-2$ | Sequence is: $-2,1,4,7,10$ |
| b | Sequence ascends in 4 s . So, counting back in 4 s $2-4=-2 \ldots-2-4=-6$ | Sequence is: $-6,-2,4,6,10$ |
| c. | Sequence ascends in 6 s . So, counting back in 6 s $2-6=-4 \ldots-4-6=-10$ | Sequence is: $-10,-4,2,6,14$ |

## Challenge

Children can count inwards until they meet in the middle of a number scale.

| 1. a. | $-2+6$ difference is $8 ; 8 \div 2=4$ | 2 |
| :---: | :--- | :--- |
| b. | $-6+2$ difference is $8 ; 8 \div 2=4$ | -2 |
| c. | $-3+9$ difference is $12 ; 12 \div 2=6$ | 3 |
| d. | $-10+-4$ difference is $6 ; 6 \div 2=3$ | -7 |
| e. | $-24+36$ difference is $60 ; 60 \div 2=30$ | 6 |

## Resource 3 - solve number and practical problems

## Workings out and answers

| 1. | $\begin{array}{ll}\text { a.7.632 } \approx 8 & \text { b. } 17.3 \approx 17\end{array}$ | C. $405.99 \approx 406$ |
| :---: | :---: | :---: |
| 2. | Largest even = 936; smallest odd = 39 | 936 and 39 |
|  | 963 rounds to 1000 | 963 |
| 3. $\frac{a}{b}$ | $47 \approx 50$ | 50 |
|  | Any number between 45 and 54 | 45, 46, ...53, 54 |
|  | $961 \approx 960$ | 960 |
|  | Any number between 85 and 94 | 85, 89, ... 90, .. 94 |
|  | Any number between 195 and 204 | 195,196, ... 203, 204 |
| 4. $\frac{a}{b}$ | Smallest odd number $=43$ | 43 |
|  | Largest 3-digit = 964 | 964 |
|  | 496 is closest to 500 | 496 |
|  | Largest 2-digit = 96; 6 is the units value | 6 |
|  | $93 \times 10=930 ; 9$ is the hundreds value | 9 |
| 5. $\frac{a}{b}$ | $-5+12=7^{\circ} \mathrm{C}$ is new temperature | $7^{0} \mathrm{C}$ |
|  | $7--1=7+1=8^{\circ} \mathrm{C}$ drop in temperature | $8^{0} \mathrm{C}$ |
| 6. | 1,000,000-500 = 999,500 | 999,500 |
| 7. | $-1+5$ difference is 6; 6 $\div 2=3$ | 2 |
| 8. | a. $£ 730$ b. $\mathbf{£ - 1 3 0}$ | c. $£ 859$ |

## Challenge

| 1. | $-4+6$ difference is $10 ; 10 \div 2=5$ | 1 |
| :--- | :--- | :--- |
| b. $-7+5$ difference is $12 ; 12 \div 2=6$ | -1 |  |

| 2. $8-2=6$; other number is $8+6=14$ | 14 |  |
| :--- | :--- | :--- |
| 3. | - It rounds to 3000 to the nearest hundred. <br> - The thousands digit is half the units digit. <br> The tens digit is the sum of the thousands and units digits. |  |
| Rounding to 3000 means any number between 2950 to 3049. <br> If the thousands digit is 3 , then units digit is 6. <br> If the tens digit is 2 , then units digit is 4. <br> The tens is either $3+6=9 \checkmark$ or $2+4=6 \checkmark$. <br> So, the 4 -digit number is 2964 or 3096. | 2964 or 3096 |  |

## Number: all four operations answers

| 6. |  | Total $=40,346+15,496+30,946+37,083=123,871$ | 123,871 |

## Challenge

| 1. | a. $4 \div 4+4 ;(4 \times 4+4) \div 4$ | 5 | c. | $4 \times 4+4 ;(4 \div 4+4) \times 4$ | 20 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| b. $4 \div 4+4+4 ;$ | 9 | d. | $(4 \times 4+4) \times 4 ;$ | 80 |  |

Resource 5 - identify common factors, multiples and prime numbers

|  | Workings out | Answer |
| :---: | :---: | :---: |
| 1. a. | $10=1 \times 10 ; 2 \times 5$ | 1, 2, 5, 10 |
| b. | $18=1 \times 18 ; 2 \times 9 ; 3 \times 6$ | 1, 2, 3, 6, 9, 18 |
| c. | $30=1 \times 30 ; 2 \times 15 ; 3 \times 10 ; 5 \times 6$ | $\begin{aligned} & 1,2,3,5,6,10 \\ & 15,30 \end{aligned}$ |
| 2. a. | Multiples of 8: 8, 16, 24, 32, 40, ... | 8, 16, 24, 32, 40 |
| b. | Multiples of $9: 9,18,27,36,45, \ldots$ | 9, 18, 27, 36, 45 |
| c. | Multiples of 12: $12,24,36,48,60 \ldots$ | 12, 24, 36, 48, 60 |
| d. | Common multiples of 9 and 12 are 36, 72, 108, and so on. | 36, 72, 108, ... |
| 3. a. | Prime | 3,13 or 29 |
| b. | Multiple of 9 | 36 |
| c. | Factor of 52 | 13 |
| d. | $48=3 \times 16$ | $48=3 \times 16$ |

| 4. | 100 or less | More than 100 |  |
| :--- | :--- | :--- | :--- |
|  | Multiple of 30 | 30,60 or 90 | $120,150, \ldots 300, \ldots$ |

## Challenge

| a. $18=2 \times 3 \times 3$ | $2 \times 3 \times 3$ |
| :---: | :--- | :--- |
| b. $50=2 \times 5 \times 5$ | $2 \times 5 \times 5$ |
| c. $90=2 \times 3 \times 3 \times 5$ | $2 \times 3 \times 3 \times 5$ |
| d. $126=2 \times 3 \times 3 \times 7$ | $2 \times 3 \times 3 \times 7$ |

## Resource 6 - BODMAS

| 1. | $7-5+4=11-5=6$ | 2. | $5-7+4=9-7=2$ |
| :--- | :--- | :--- | :--- |
| 3. | $7 \times 3-2=21-2=19$ | 4. | $2 \times 6+3=12+3=15$ |
| 5. | $8 \div 2+5=4+5=9$ | 6. | $12 \div 2-3=6-3=3$ |
| 7. | $7+3 \times 4=7+12=19$ | 8. | $9-3 \times 2=9-6=3$ |
| 9. | $18-5 \times 3=18-15=3$ | 10. | $7+15 \div 5=7+3=10$ |
| 11. | $(8-5) \times 4=3 \times 4=12$ | 12. | $(2+7) \div 3=9 \div 3=3$ |

## Challenge

| 1. | a. $\quad 8 \times(4-2)=16$ | 2. Allow reversals of the order of the sums and possible variations. |
| :--- | :--- | :--- |
| b. $12 \div(1+5)=2$ | a $5 \times 6=30$ |  |
| c. $\quad(3+4) \times 5=35$ | b $5 \times(8-2)=5 \times 6=30$ |  |
| d. $\quad(4+2) \times(5-3)=15$ | c $8 \times(5-2)+6=8 \times 3+6=24+6=30$ |  |
| e. $(9-3 \times 2) \times 5=15$ | d $(5+6) \times 2+8=11 \times 2+8=22+8=30$ |  |
|  | e $2^{5}+6-8=32+6-8=30$ |  |

Resource 7 - addition and subtraction multi-step problems

## Challenge

a. Each corner number is added twice. $8+12+10=30$.

This means the corners must all add up to 15 ( $1 / 2$ of 30 ).
To ' 8 ' we can use $1+7,2+6$ or $3+5$. By elimination, only the 3 and 5 completed the remaining answers.
Note: $15-8=7$

b. $13+17+18=48.1 / 2$ of $48=24$.

If the three numbers add to give 24 and the first 2 add up to say 13 , then 24-13 = 11 must be one of the numbers.
17-11=6, and, 13-6=7

Resource 8 - addition, subtraction, multiplication and division problems

Number: answers

| 5. | $\begin{aligned} & \text { Halfway }=648 \div 2=324 \\ & \text { Remaining pages }=324-197=127 \text { pages } \end{aligned}$ |  |  |  |  |  |  |  |  | 127 pages |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 6. |  |  |  |  | 3 | 15 | 120 | 8 |  |  |
| 7. | Pupils for dinner $=238-13-17=208$. <br> 3 times as many means $3+1=4$ groups. $208 \div 4=52$ <br> So, 52 have a packed lunch and $3 \times 52=156$ have the hot meal. |  |  |  |  |  |  |  |  | 156 pupils |
| 8. | Work backwards and do the opposite. |  |  |  |  |  |  |  |  | Starts with 11 |

## Challenge

1. Start at the end and work backwards.

Michael: end $+75=$ start $(M)$
Trisha: end $+20=$ start ( T )
But start $(M)=2 \times$ start $(T)$ or start $(T)=1 / 2$ of start $(M)$.
So, the extra (75-20) = 55 must be what Trisha started with. So Michael started with $2 \times £ 55=£ 110$.

## £110

Letting $E$ be end
$E+75=2(E+20)$
$E+75=2 E+40$
$35=E$
$M=35+75=110$

Resource 9 - use estimation to check answers

| 1. | $34 \times 18 \approx 30 \times 20=600$ |  |  |  |  | c. 600 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2. | $342 \div 22 \approx 300 \div 20=15$ rows |  |  |  |  | b. 15 |
| 3. | $54 \times 16 \approx 50 \times 20=1000$ pence $=£ 10$ |  |  |  |  | £10 |
| 4. | $197 \div 42 \approx 200 \div 40=5 \mathrm{~kg}$ |  |  |  |  | 5 kg |
| 5. | Question |  | Rounding | Estimate | Actual |  |
|  | a. | 15,463 + 8946 | 15,000 + 9000 | 24,000 | $24,409$ |  |
|  | b. | 7631-2814 | 8000-3000 | 5000 | $4817$ |  |
|  | c. | $78 \times 437$ | $80 \times 400$ | 32,000 | $34,086$ |  |
|  | d. | $5632 \div 32$ | $6000 \div 30$ | 200 | 176 |  |
| 6. | x 1000 | $\times 100$ | Number | $\div 10$ | $\div 100$ |  |
|  | 42000 | 4200 | 42 | 4.2 | 0.42 |  |
|  | 6750 | 675 | 6.75 | 0.675 | 0.0675 |  |
|  | 23,000 | 2300 | 23 | 2.3 | 0.23 |  |
|  | 60,000 | $6000$ | 60 | 6 | 0.6 |  |
|  | 45,000 | - 4500 | 45 | 4.5 | 0.45 |  |

| 7. $2392 \times 52 \approx 2000 \times 50=100,000$ patients in 2018 | 100,000 |  |
| :--- | :--- | :---: |
| 8. | a. 387 is the closest to 500 | 387 |
|  | b. $873 \times 10=8730$ ( 7 hundred) | $\mathbf{7 0 0}$ |
|  | c. $3678 \div 1000=3.678$ (7 tenths) | $\mathbf{7}$ tenths |

## Challenge

1. e.g. $50+30=80$ (rounded to nearest 10) 50 could be 45-54; 30 could be 25-34.
So maximum sum is $54+34$.

So maximum sum is $54+34$

## Number: fractions (including decimals and percentages)

Resource 1 - use common factors to simplify fractions

## Challenge

1. a. $\frac{5}{12}=\frac{20}{48}=\frac{10}{24}$
b. $\frac{10}{8}=\frac{30}{24}=\frac{5}{4}$

Resource 2 - add and subtract fractions

## Resource 3 - scale factors

## Challenge

Resource 4 - unequal sharing

|  | Workings out | Answers |
| :---: | :---: | :---: |
| 1. | 34-8 = 26 marbles left. Joseph has $26 \div 2=13$ marbles. Erica has $13+8=21$ | Erica has 21 marbles |
| 2. | 16-6 = 10 m left. <br> Smaller piece is $10 \mathrm{~m} \div 2=5$ metres (longer $=11 \mathrm{~m}$ ). | 5 metres |
| 3. | As Beth $=2 \times$ Clive and Beth + Clive $=33$, then $3 \times$ Clive $=33$ So, $1 \times$ Clive $=33 \div 3=11$. So, Beth $=2 \times 11=22$ oranges . | Clive 11; Beth 22 |
| 4. | Fraction red $=1-\frac{3}{4}=\frac{1}{4}$ which equals 5 red balls. Total $=4 \times 5=20$ altogether. | $20$ <br> altogether |
| 5. a. | 60 is half of 120 . So, Julie can make $10 \div 2=5$ pancakes. | 5 pancakes |
| b. | 150 ml milk : 120 g flour ... dividing by 3 <br> 50 ml milk : 40 g flour ... multiplying by 2 <br> 100 ml milk: $\mathbf{8 0} \mathrm{g}$ flour | 80 g flour |
| 6. | Take off Alex's extra 6 cards to leave 32-6=26. $26 \div 2=13$. So, Alex has $13+6=19$ cards. | Alex has 19 cards |
| $7 .$ | Leave out the ' 5 ' until the end. If he eats $\frac{1}{3}$ then $\frac{2}{3}$ must be left over $=16$. If $\frac{2}{3}(2$ parts $)=16$, then $\frac{1}{3}(1$ part $)=16 \div 2=8$. <br> So, all ( 3 parts) $=8 \times 3=24$, plus the ' 5 ' $=29$ sweets. | 29 sweets |
| 8. | $1-\frac{5}{8}=\frac{3}{8}$ are poor. <br> As $\frac{3}{8}(3$ parts $)=42$, then $\frac{1}{8}(1$ part $)=42 \div 3=14$. <br> So, all ( 8 parts) $=8 \times 14=112$ pencils. | 112 pencils |
| $9 .$ | If $\frac{2}{3}$ are medium, then $1-\frac{2}{3}=\frac{1}{3}$ are either small or large. Since they are the same number 8 , then $\frac{1}{3}=8+8=16$. So, the total eggs laid $=3 \times 16=48$ eggs altogether. | 48 eggs |

## Challenge

If $\frac{2}{9}$ are blue, then $\frac{7}{9}$ are either red or white. Ratio = blue $:$ red or white is 2 : 7.

Since the ratio of blue to red is $2: 3$ then the portion of white is $9-2-3=5$.
1.

So complete ratio is $B: R$ : W
2:3:4
We need a multiple of 9 between 175 and $185=180$.
Now $180 \div 9=20$
So blue $=2 \times$
20 = 40;

So blue $=2 \times 20=40$; red $=3 \times 20=60$; white $=4 \times 20=80$

## Algebra

## Resource 1 - use simple formulae

## Challenge

| 1. a. | Peppa's cost $3 \times £ 2=£ 6$; Salty's cost $=5+0.5 \times 3=5+1.5=£ 6.50$. Peppa's is cheaper (by 50p). | Peppa's is cheaper (by 50p) |
| :---: | :---: | :---: |
| b. | $5+0.5 \times N=9$ <br> First subtract 5 from both sides. $0.5 \times N=4$ <br> Next divide by 0.5. <br> $\mathrm{N}=8$ pizzas. <br> So, Peppa's cost $8 \times £ 2=£ 16$. | Peppa's cost $8 \times$ $£ 2=£ 16$ |

## Resource 2 - generate and describe linear number sequences

| Workings out |  |  |  |
| :--- | :--- | :--- | :--- |
| 1. | a. | $1,4,7,10,13,16(+3)$ | $\mathbf{7 , 1 3 , 1 6}$ |
|  | b. | $4,10,16,22,28,34(+6)$ | $\mathbf{1 6 , 2 2 , 3 4}$ |

Algebra: answers

## Challenge

1. a. Sequence is $7,13,19,25$ (the rule is $M=\mathbf{N N + 1}$ ).
$6 \mathrm{~N}+1=50(-1)$
$6 \mathrm{~N}=49(\div 6)$
$N=49 \div 6=8 r 1$, so eight complete shapes with one spare matchstick.

Sequence is $7,13,19,25$ (the rule is $M=6 N+1)$

One spare matchstick.

## Resource 3 - express missing numbers algebraically

|  | Workings out | Answers |
| :---: | :---: | :---: |

| ii. | when $y=12,4 x=20-12=8, x=8 \div 4 . x=2$ | ii. $x=2$ |

## Challenge

$r+s=16 \ldots$ pairs are $(1,15) ;(2,14) ;(3,13) ;(4,12) ;(5,11) ;(6,10) ;(7$,

$r=11$ and $s=5$
$v+w=7 \ldots$ pairs are $(1,6) ;(2,5) ;(3,4) ;(4,3) ;(5,2) ;(6,1) ; \ldots$
$3 v+2 w=16 \ldots$ letting $v$ have even numbers: $2,4,6, \ldots$
b. When $v=2,3 v=6,2 w=16-6=10 ; f=5 \ldots(2,5)$
$v=2$ and $w=5$

## Measurement

Resource 1 - solve problems involving units of measure

|  |  | Workings out | Answers |
| :---: | :---: | :---: | :---: |
| 1. | a. | $4.5 \mathrm{~km}=4.5 \times 1000 \mathrm{~m}=4500 \mathrm{~m}$ | 4500 m |
|  | b. | $3.6 \mathrm{cl}=3.6 \times 10 \mathrm{ml}=36 \mathrm{ml}$ | 36 ml |
|  | c. | $3.45 \mathrm{~kg}=3.45 \times 1000 \mathrm{~g}=3450 \mathrm{~g}$ | 3450 g |
|  | d. | $0.85 \mathrm{~cm}=0.85 \times 10 \mathrm{~mm}=8.5 \mathrm{~mm}$ | 8.5 mm |
|  | e. | $1.375 \mathrm{l}=1.375 \times 1000 \mathrm{ml}=1375 \mathrm{ml}$ | 1375 ml |
|  | f. | $3250 \mathrm{~g}=3250 \div 1000 \mathrm{~kg}=3.25 \mathrm{~kg}$ | 3.25 kg |
|  | g. | $65 \mathrm{~cm}=65 \div 100 \mathrm{~m}=0.65 \mathrm{~m}$ | 0.65 m |
|  | h. | $875 \mathrm{~m}=875 \div 1000 \mathrm{~km}=0.875 \mathrm{~km}$ | 0.875 km |
| 2. |  | Return journey each day for 5 days means $10 \times 273 \mathrm{~m}=2730 \mathrm{~m}$ $2730 \mathrm{~m}=2730 \div 1000=2.73 \mathrm{~km}$ | 2.73 km |
| 3. |  | $\begin{aligned} & 20 \times 295 \mathrm{ml}=5900 \mathrm{ml} \\ & 5900 \mathrm{ml}=5900 \div 1000 \mathrm{l}=5.9 \text { litres } \end{aligned}$ | 5.9 litres |
| 4. |  | $\begin{aligned} & 145 \times 9=1305 \mathrm{~g} \\ & 1305 \mathrm{~g}=1305 \div 1000 \mathrm{~kg}=1.305 \mathrm{~kg} \end{aligned}$ | 1.305 kg |
| 5. |  | $\begin{aligned} & 3 \mathrm{~km}=3 \times 1000 \mathrm{~m}=3000 \mathrm{~m} \\ & 3000 \mathrm{~m} \div 200 \mathrm{~m}=15 \ldots \text { so } 15 \text { days } \end{aligned}$ | 15 days |
| 6. |  | $53 \div 7=7$ r 4, so 7 weeks 4 days | 7 weeks 4 days |
| 7. |  | Children can count on using a number line. | 3.25pm |
| 8. |  | ```10 boxes of 12 = 10 }\times12\mathrm{ pencils = 120 pencils Weight = 120 < 11 g = 1320 g ... + 10 boxes each 15 g=10 < 15 g= 150 g Total = 1320 g + 150 g= 1470 g=1470 \div1000 kg=1.47 kg``` | 1.47 kg |
| 9. |  | $\begin{aligned} & 5 \text { glasses }=5 \times 160 \mathrm{ml}=800 \mathrm{ml} . .1 \text { litre }=1000 \mathrm{ml} \\ & 1000 \mathrm{ml}-800 \mathrm{ml}=200 \mathrm{ml} \text { left over } \end{aligned}$ | 200 ml |
| 10. | a. | Paula: 4.62 km ; Kate: 4.75 km ; Alex: $4560 \div 1000=4.56 \mathrm{~km}$ | Kate |
|  | b. | $4.62 \mathrm{~km}+4.75 \mathrm{~km}+4.56 \mathrm{~km}=13.93 \mathrm{~km}$ | 13.93 km |
| 11. | a. | $\begin{aligned} & 24 \times 7 \mathrm{~g}=168 \mathrm{~g} . \text { So, } 30 \text { packs }=168 \mathrm{~g} \times 30=5040 \mathrm{~g} \\ & 5040 \mathrm{~g} \div 1000 \mathrm{~kg}=5.04 \mathrm{~kg} \end{aligned}$ | 5.04 kg |
|  | b. | $1 / 2 \mathrm{~kg}=1 / 2 \times 1000 \mathrm{~g}=500 \mathrm{~g}$. How many 168 g (packs) make 500 g Build up table: $168 \quad 336 \quad 504 \quad$ (672) ... He needs 3 packs | 3 packs |

## Challenge

| 1. | Offer A: $9 \times 79 \mathrm{p}=711 \mathrm{p}$ <br> Offer B: $9 \mathrm{l}=9000 \mathrm{ml}$. Number of bottles $=9000 \div 300=30$ bottles. <br> Either buy 4 packs ( 32 bottles) costing $4 \times £ 2=£ 8$ or <br> 3 packs @ $3 \times £ 2+6$ bottles $(6 \times 300 \mathrm{ml}=1800 \mathrm{ml})$ [ $2 \times 1$ litre bottles] £6 $+2 \times 79 \mathrm{p}=£ 7.58$. <br> Offer A is the better option | Offer A is the better option |
| :---: | :---: | :---: |
| 2. | $1 / 2 \mathrm{~m}=50 \mathrm{~cm}$. <br> Now 7 books $=7 \times 6.4 \mathrm{~cm}=44.8 \mathrm{~cm}$ <br> So, gap $=50 \mathrm{~cm}-44.8 \mathrm{~cm}=5.2 \mathrm{~cm}$ | $\begin{aligned} & \text { Gap }=50 \mathrm{~cm}- \\ & 44.8=5.2 \mathrm{~cm} \\ & 52 \text { millimetres } \end{aligned}$ |

Resource 2 - convert between miles and kilometres

|  | Workings out |  |  |  | Answers |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1. | a. $A=6 \times 2=12 \mathrm{~cm}^{2}$ | b. $A=5 \times 3=15 \mathrm{~cm}^{2}$ |  |  | C. $A=4 \times 3=12 \mathrm{~cm}^{2}$ |
|  | $P=6+2+6+2=16 \mathrm{~cm}$ | $\mathrm{P}=5+3+5+3=16 \mathrm{~cm}$ |  |  | $P=4+3+4+3=14 \mathrm{~cm}$ |
| $2 \quad \mathrm{a}$ | Perimeter of $\mathbf{P}$ and $\mathbf{Q}$ are the same ( 10 cm ). |  |  |  | $\mathbf{P}$ and Q |
| b | Perimeter $=6 \mathrm{~cm}$; area $=2 \mathrm{~cm}^{2}$ |  |  |  | $2 \mathrm{~cm}^{2}$ |
| c | $\begin{aligned} & \text { Perimeter }=3+2+3+2=10 \mathrm{~cm} \\ & \text { Perimeter }=6+1+6+1=14 \mathrm{~cm} \end{aligned}$ |  |  |  |  |
| 3 a | $\begin{aligned} & P=2 l+2 w \\ & P=14 \mathrm{~cm}+10 \mathrm{~cm} \\ & P=24 \mathrm{~cm} \end{aligned}$ |  | $\text { b } \quad \begin{aligned} & \text { P }=2 l+2 w \\ & 40 m=16 m+2 w \\ & 40 m-16 m=24 m \\ & \\ & 24 m \div 2=12 m \end{aligned}$ |  |  |
| 4. | Possible answers: |  |  |  |  |
| $5 .$ | Shape 1: Area $=4$; Perimeter $=8$ <br> Shape 2: Area $=5$; Perimeter $=10$ <br> There are others. | 1 | 2 |  |  |
| 6 a | Perimeter $=3+6+3+6+(3)+3+6$ | $6=30$ | cm |  | 30 cm |
| b | Perimeter $=3+(3)+6+(3)+3+6+3$ | 3+6+ | +3+6=42 cm |  | 42 cm |

## Challenge

1. $\quad \mathrm{Q}, \mathrm{R}, \mathrm{S}$ same area and perimeter as P .

Resource 4 - use formula for area and volume of shapes answers

|  |  | Workings out | Answers |
| :---: | :---: | :---: | :---: |
| 1. | a. | Volume $=8 \times 5 \times 6=240 \mathrm{~cm}^{3}$ | $240 \mathrm{~cm}^{3}$ |
|  | b. | Volume $=10 \times 2.5 \times 3=75 \mathrm{~cm}^{3}$ | $75 \mathrm{~cm}^{3}$ |
|  | c. | Volume $=5 \times 3 \times 2=30 \mathrm{~m}^{3}$ | $30 \mathrm{~m}^{3}$ |
| 2. |  | $\begin{aligned} & \text { Volume }=4 \times 2 \times h=24 \mathrm{~cm}^{3} \\ & 8 h=24 \quad(\div 8) \\ & h=3 \end{aligned}$ | Height $=3 \mathrm{~cm}$ |
| 3. |  | $30 \times 1 \times 1=30 \mathrm{~cm}^{3} ; 15 \times 2 \times 1=30 \mathrm{~cm}^{3} ; 10 \times 3 \times 1=30 \mathrm{~cm}^{3}$; <br> $6 \times 5 \times 1=30 \mathrm{~cm}^{3} ; 5 \times 3 \times 2=30 \mathrm{~cm}^{3}$ and many rotations of these... $3 \times 2 \times 5=30 \mathrm{~cm}^{3}$ etc. |  |
| 4. |  | $60 \div 5=12$, so 12 times multiplication facts: $1 \times 12,2 \times 6,3 \times 4$ in either order. | $\begin{aligned} & 1 \times 12 \\ & 2 \times 6 \\ & 3 \times 4 \end{aligned}$ |
| 5. |  | Area of face $=I \times \boldsymbol{w}=16 \ldots$ but $4 \times 4=16 \mathrm{~cm}^{2}$ <br> Volume $=l \times l \times l=4 \times 4 \times 4=64 \mathrm{~cm}^{3}$ | $64 \mathrm{~cm}^{3}$ |
| 6. |  | Dimensions of top cuboid: length $=3 \mathrm{~cm}$; width $=3 \mathrm{~cm}$; height $=7$ $\begin{aligned} & 4=3 \mathrm{~cm} \\ & 3 \times 3 \times 3=27 \mathrm{~cm}^{3} \end{aligned}$ <br> Volume of bottom cuboid $=8 \times 3 \times 4=96 \mathrm{~cm}^{3}$ <br> Total volume $=27+96=123 \mathrm{~cm}^{3}$ | $123 \mathrm{~cm}^{3}$ |

## Challenge

Box A volume $=20 \mathrm{~cm} \times 30 \mathrm{~cm} \times 10 \mathrm{~cm}=6000 \mathrm{~cm}^{3}$
Box $B$ volume $=20 \mathrm{~cm} \times 10 \mathrm{~cm} \times 25 \mathrm{~cm}=5000 \mathrm{~cm}^{3}$

Box A is the largest and will collect most water.

Resource 5 - calculate the area of parallelograms and triangles answers

## Challenge

| Larger Square: | Smaller Square: | Shaded area of smaller square: |  |
| :--- | :--- | :--- | :--- |
| Length $=9+4=13$ Area of one triangle $=$ <br> cm. <br> $9 \times 4 \div 2=18 \mathrm{~cm}^{2}$. $=169-72=97 \mathrm{~cm}^{2}$ <br> Area $=13 \times 13=169$ Area of 4 triangles $=4$ <br> $\times 18=72 \mathrm{~cm}^{2}$ |  | $169 \mathrm{~cm}^{2}$ |  |
| $\mathrm{~cm}^{2}$. |  |  |  |

## Geometry

Resource 1-draw, compare and classify 2D shapes

Challenge

| 1. |  |
| :--- | :--- | :--- |
| $60^{\circ}+60^{\circ}=120^{\circ}$ |  |
| $360^{\circ}-120^{\circ}=240^{\circ}$ |  |
| $240^{\circ} \div 2=120^{\circ}$ | 6 cm |

Resource 2 - recognise, describe and build simple 3D shapes answers

| Workings out |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1. | Cuboid |  | Triangular prism | Triangle-based pyramid | Sphere |
| 2. | Cube |  | Cuboid | Pentagonal pyramid |  |
| 3. |  | At least one square face |  | No square faces |  |
|  | Curved face | Cuboid <br> Square-based pyramid Cube |  | Sphere Cone Cylinder |  |
|  | No curved faces |  |  | Tetrahedron Triangular prism Hexagonal prism |  |
| 4. |  |  |  |  |  |
| 5. |  |  | Number of faces | Number of Vertices | Number of edges |
|  | Cuboid |  | 6 | 8 | 12 |
|  | Cylinder |  | 3 | 0 | 2 |
|  | Tetrahedron |  | 4 | 4 | 6 |
|  | Hexagonal prism |  | 8 | 12 | 18 |
|  | Cube |  | 6 |  | 12 |
| 6. | Shape Properties |  |  | Name of shape |  |
|  | 6 rectangular faces, 12 edges and 8 vertices |  |  | Cuboid |  |
|  | 1 curved face, 1 flat face, 1 vertex and 1 edge 7 flat faces, 15 edges and 10 vertices |  |  | Cone |  |
|  |  |  |  | Pentagonal prism |  |
|  | 1 curved face, no edges and no vertices |  |  | Sphere |  |
| 7 |  |  |  |  | $2 \times 2 \times 2$ cube |

## Challenge

1. Net C does not make the ( 3 by 2 by 1 ) rectangle.

There are many variations of the one rectangle either side of the 'four in a row' sequence. So the following three nets work; the first is the original net D.

Check that the child's net has three sets of matching paired rectangles, e.g. 2 lots of 3 by 1, 2 lots of 3 by 2 and 2 lots of 2 by 1 . Here are two others:

Resource 3 - illustrate and name parts of the circle answers

|  | Workings out |  |  |  |  |  |  |  | Answers |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. | Diameter $=2 \times$ radius $=2 \times 12=24 \mathrm{~cm}$ |  |  |  |  |  |  |  | $\mathrm{D}=24 \mathrm{~cm}$ |
| 2. | Radius $=$ Diameter $\div 2=7 \div 2=3.5 \mathrm{~m}$ |  |  |  |  |  |  |  | $\mathrm{R}=3.5 \mathrm{~m}$ |
| 3. |  |  |  |  |  |  |  |  |  |
| 4. $\begin{array}{r}\text { a } \\ \text { b } \\ \text { c }\end{array}$ | Diameter $=2 \times$ radius $=2 \times 9=18 \mathrm{~cm}$ |  |  |  |  |  |  |  | $D=18 \mathrm{~cm}$ |
|  | Diameter $=2 \times$ radius, so $10 \mathrm{~cm} \div 2=5 \mathrm{~cm}$ |  |  |  |  |  |  |  | $\mathrm{R}=5 \mathrm{~cm}$ |
|  | For 5 eggs she needs $36 \mathrm{~cm} \times 5=180 \mathrm{~cm}$ |  |  |  |  |  |  |  | 180 cm |
| 5. | $\text { Diameter }=2 \times \text { radius }=2 \times 12=24 \mathrm{~mm} .$ <br> 1 metre $=1000 \mathrm{~mm}$. We need to find how many groups of 24 are in 1000. $1000 \div 24=41 \text { r } 16$ |  |  |  |  |  |  |  | a. $4110 p$ coins |
|  |  |  |  |  |  |  |  |  |  |
|  | $\begin{aligned} 10 \mathrm{p} \text { coins } & =41 \times 10 \mathrm{p} \\ & =410 \mathrm{p}=£ 4.10 \end{aligned}$ | 2 |  | /1 | 10 | ${ }^{10} 0$ | ${ }^{4} 0$ |  | b. £4.10 |
| 6. | $\begin{aligned} & \text { Diameter }=2 \times \text { radius }=2 \times 14=28 \mathrm{~mm}=\text { height of pile } \\ & \text { Thickness of one coin }=28 \div 14=2 \mathrm{~mm} \end{aligned}$ |  |  |  |  |  |  |  | Thickness $=2$ mm |

## Challenge

| Smaller circle: diameter $=2 \times$ radius $=2 \times 6=12 \mathrm{~cm}$ |
| :--- | :--- |
| Total length $=5 \times 12 \mathrm{~cm}=60 \mathrm{~cm}$ |
| Larger circle: diameter $=60 \mathrm{~cm} \div 3=20 \mathrm{~cm}$ | | We need the length of the square. |
| :--- |
| Diameter $=2 \times$ radius $=2 \times 2=4 \mathrm{~cm}$. <br> Length $=3 \times 4=12 \mathrm{~cm}$ <br> Area of square $=12 \times 12=144 \mathrm{~cm}^{2}$ |
| 2.20 cm |

## Resource 4 - recognise angles answers

|  | Workings out | Answers |
| :---: | :---: | :---: |
| 1. a. | $\begin{aligned} & \text { Straight line }=180^{0} \\ & \text { So far } 47^{0}+92^{0}=1399^{0} \\ & \mathrm{a}^{0}=180^{0}-139^{0} \\ & \mathrm{a}^{0}=41^{0} \end{aligned}$ | $\mathrm{a}=41^{0}$ |

| b. | $\begin{aligned} & \text { So far } 90^{\circ}+61^{0}=151^{0} \\ & b^{0}=180^{0}-151^{0} \\ & b^{0}=29^{\circ} \end{aligned}$ | $b=29^{\circ}$ |
| :---: | :---: | :---: |
| c. | $\begin{aligned} & \text { So far } 180^{\circ}-70^{0}=110^{0} \\ & \mathrm{c}^{0}=110^{0} \div 2 \text { [both angles equal] } \\ & \mathrm{c}^{0}=55^{0} \end{aligned}$ | $\mathrm{c}=55^{\circ}$ |
| 2. | We have $49^{\circ}+74^{\circ}+67^{\circ}=190^{\circ}$ not $180^{\circ}$ | No |
| 3. a. | $\begin{aligned} & \text { Full turn }=360^{0} \\ & \text { So far } 90^{\circ}+116^{0}=206^{0} \\ & d^{0}=360^{0}-206^{0} \\ & d^{0}=154^{0} \end{aligned}$ | $\mathrm{d}=154^{0}$ |
| b. | $\begin{aligned} & \text { Full turn }=360^{0} \\ & \text { So far } 114^{0}+143^{0}+72^{0}=329^{0} \\ & \mathbf{e}^{0}=360^{0}-329^{0} \\ & \mathbf{e}^{0}=31^{0} \end{aligned}$ | $\mathrm{e}=31^{0}$ |
| c. | $\begin{aligned} & \text { So far } 360^{0}-164^{0}=196^{0} \\ & \left.f^{0}=196^{0} \div 4 \text { [four equal angles, } f^{0}\right] \\ & f^{0}=49^{0} \end{aligned}$ | $\mathrm{f}=49^{\circ}$ |
| 4. | $\begin{aligned} & \text { So far } 90^{0}+55^{0}+55^{0}=200^{\circ} \\ & \mathbf{w}^{0}=360^{0}-200^{\circ}=160^{0} \end{aligned}$ | $\mathrm{w}=160^{\circ}$ |
| 5. | The two unknown (equal) angles are: $180^{\circ}-150^{\circ}=30^{\circ}$. So far, $90^{\circ}+30^{\circ}+30^{\circ}+150^{\circ}=300^{\circ}$ <br> So, $\begin{aligned} \mathrm{x}^{0} & =360^{\circ}-300^{\circ} \\ & =60^{\circ}\left[\text { or } 90^{\circ}-30^{\circ}=60^{\circ}\right] \end{aligned}$ | $\mathrm{x}=60^{\circ}$ |
| $6 .$ | If the smaller angle is $\mathbf{x}^{0}$, then the larger angle is $\mathbf{2 x ^ { 0 }}$. Angles around a point add up to $360^{\circ}$. <br> So, $\begin{aligned} & x^{0}+2 x^{0}+60^{0}=360^{\circ} \\ & 3 x^{0}+60^{\circ}=360^{\circ} \ldots,-60^{\circ} \\ & 3 x^{0}=300^{\circ} \ldots \cdot \div 3^{\prime} \\ & x^{0}=100^{\circ} ; \text { larger }=2 \times 100^{\circ}=200^{\circ} \end{aligned}$ | $100^{\circ} ; 200^{\circ}$ |
| $7 .$ | $\begin{aligned} & h=130^{\circ} \text { (vertically opposite) } \\ & i=180^{\circ}-35^{\circ} \\ & =145^{\circ} \end{aligned}$ <br> Third angle in triangle is $180^{\circ}-\left(35^{\circ}+130^{\circ}\right)$ $=180^{\circ}-165^{\circ}$ $=15^{0} \cdot \mathrm{j}^{0}=15^{0} \text { (vertically opposite) }$ | $\begin{aligned} & h=130^{\circ} \\ & i=145^{\circ} \\ & j=15^{\circ} \end{aligned}$ |
| 8. | $\begin{aligned} & \mathrm{s}^{0}=180^{0}-130^{0}=50^{0} \\ & \mathrm{t}^{0}=180^{\circ}-\left(90^{0}+50^{\circ}\right)=40^{0} \\ & \mathbf{u}^{0}=180^{\circ}-\left(40^{\circ}+75^{\circ}\right)=65^{0} \\ & \mathbf{v}^{0}=180^{\circ}-\left(90^{0}+65^{\circ}\right)=25^{0} \end{aligned}$ | $\begin{aligned} & \mathrm{s}=50^{0} \\ & \mathrm{t}=40^{\circ} \\ & \mathrm{u}=65^{0} \\ & \mathrm{v}=25^{0} \end{aligned}$ |

## Challenge

| 1. | Isosceles triangle with the two base angles, $\mathrm{a}^{0}$ equal. $\text { So, } 180^{\circ}-82^{\circ}=98^{\circ}$ <br> $a^{0}=98^{\circ} \div 2$ (equal angles) $a^{0}=49^{0}$ | $\mathrm{a}^{0}=49^{\circ}$ |
| :---: | :---: | :---: |
|  | Three angles of $82^{\circ}$ and three angles of $b^{0}$ around a point. $\begin{aligned} & 82^{0}+82^{0}+82^{0}=246^{0} \\ & 360^{0}-246^{0}=114^{0} \\ & b^{0}=114^{0} \div 3 \\ & b^{0}=38^{0} \end{aligned}$ | $b^{0}=38^{\circ}$ |

Resource 1-draw, translate and reflect shapes in all four quadrants answers:

## Challenge

1. a. $(2,5)$ translates 3 units to the left to give $(-1,5)$.
b. $(0,-2)$ translates 2 up to give $(0,0)$.
c. $(-4,1)$ reflects in the $(\ldots .$. a) $x$-axis to give ( $-4-1$ ).
i. $x$-axis to give $(-4-1)$. ii. $y$-axis to give $(4,1)$.

## Statistics

Resource 1 - interpret and construct pie charts and line graphs

## Workings out

Answers

## Challenge

| 1. a. | 2 out of 12 fail $=\frac{1}{6}=8$. So altogether $=6 \times 8=48$ girls |  |  |  |  |  |  | 40 girls passed |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 10 out of 12 pass $=\frac{5}{6} \ldots \frac{5}{6}$ of $48=48 \div 6 \times 5=8 \times 5=40$ passed |  |  |  |  |  |  |  |
| b. | 5 out of 12 boys fail $=\frac{5}{12}$ of $48=48 \div 12 \times 5=20$ boys failed |  |  |  |  |  |  | $20 \text { boys }$ <br> failed |
| 2. | Adding up the total for day: |  |  |  |  |  |  |  |
|  |  | 7am | 9am | 11am | 1pm | 3pm | 5pm | Total |
|  | Thursday | 350 | 300 | 600 | 700 | 400 | 400 | 2750 |
|  | Saturday | 400 | 300 | 700 | 300 | 700 | 600 | 3000 |

Saturday was warmer as more water was drunk during that day.

Resource 2 - using the mean answers

Workings out
Answers

| 1. a. | Mean $=(4+6+3+7) \div 4=20 \div 4=5$ | 5 |
| :---: | :---: | :---: |
| b. | Mean $=(3+8+8+4+7) \div 5=30 \div 5=6$ | 6 |
| c. | Mean $=(1+0+9+6+4+10) \div 6=30 \div 6=5$ | 5 |
| 2. | Mean $=(18+20+17+15+14+12) \div 6=96 \div 6=16$ | $16^{\circ} \mathrm{C}$ |
| 3. | Total $=2 \times 8=16$ <br> Other number $=16-5=11$ | 11 |
| 4. | Total $=2 \times 3=6$. So, both numbers have to add up to 6 . 1 and 5; 2 and 4; 3 and 3; 0 and 6 | $\begin{aligned} & 1 \text { and } 5 ; \\ & 2 \text { and } 4 ; \\ & 3 \text { and } 3 ; \\ & 0 \text { and } 6 \end{aligned}$ |
| 5. | Mean $=(8+12+7+13) \div 4=40 \div 4=10$ | 10 |
| 6. | Total $=3 \times 7=21$. So far $4+4=8$. Third number $=21-8=13$ | 13 |
| 7. | Total $=4 \times 12=48$. So far, we have $14+9+11=34$. Mike needs to score $48-34=14$ points in the fourth quarter. | 14 points |
| 8. | Total $=4 \times 6=24$. So far, we have $4+7+3=14$. Missing number is $24-14=10$ | 10 |
| 9. | Total $=5 \times 11=55$. So far, we have $2 \times 14=28$. Remaining 3 numbers add up to $55-28=27$. Mean $=27 \div 3=9$ | 9 |
| 10. | Total of seven numbers $=7 \times 3=21$ <br> Total of five numbers $=5 \times 15=75$ <br> Total of all twelve numbers $=21+75=96$ <br> Mean of all twelve numbers $=96 \div 12=8$ | 8 |

## Challenge

| 1. | Putting the results into a table. |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Age in years | No. of children | Total | Mean $=200 \div 50=4$ |
|  | 1 | 4 | $1 \times 4=4$ |  |
|  | 2 | 8 | $2 \times 8=16$ |  |
|  | 3 | 5 | $3 \times 5=15$ |  |
|  | 4 | 12 | $4 \times 12=48$ |  |
|  | 5 | 9 | $5 \times 9=45$ |  |
|  | 6 | 12 | $6 \times 12=72$ |  |
|  |  | 50 | 200 |  |

[^0]:    - we round down.

[^1]:    £.
